L'architecture Des Lumieres De Soufflot A Ledoux:

L'architecture des Lumières de Soufflot à Ledoux Allan Braham, 1982 *L'architecture de Soufflot Ledoux* *Autour de Ledoux* Maison des sciences de l'homme et de l'environnement Claude Nicolas Ledoux, 2008 Contributions articulées autour de trois grands axes l'œuvre bâtie et écrite de Claude Nicolas Ledoux 1736 1806 auteur du livre *L'architecture considérée sous le rapport de l'art des mœurs et de la législation* les influences les concurrences et les héritages de Ledoux les architectures des villes idéales imaginaires ou réalisées du XVIIIe au XXe siècle **Claude-Nicolas Ledoux** Anthony Vidler, 2021-08-02 Claude Nicolas Ledoux 1736 1806 is today regarded as chief representative of French revolutionary architecture With his extraordinary inventiveness he projected the architectural ideals of his era Ledoux's influential buildings and projects are presented and interpreted both aesthetically and historically in this book His best known projects the Royal Saltworks of Arc et Senans the tollgates of Paris the ideal city of Chaux reveal the architect's allegiance to the principles of antiquity and Renaissance but also illustrate the evolution of his own utopian language With the French Revolution Ledoux ceased building as his contemporaries perceived him as a royal architect *Soufflot et l'architecture des lumières* Jacques G. Soufflot, 1986 *Hut Pavilion Shrine: Architectural Archetypes in Mid-Century Modernism* Miles David Samson, 2016-03-09 The phase of American architectural history we call mid century modernism 1940 1980 saw the spread of Modern Movement tenets of functionalism social service and anonymity into mainstream practice It also saw the spread of their seeming opposites Temples arcades domes and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s *Hut Pavilion Shrine* examines this crossroads of modernism and the archetypal and critiques its buildings and theory The book centers on one particularly important and omnipresent type the pavilion a type which was the basis of major work by Louis I Kahn Paul Rudolph Philip Johnson Minoru Yamasaki and other eminent architects While focusing primarily on the architecture culture of the United States it also includes the work of British European Team X and Scandinavian designers and writers Making connections between formal analysis historical context and theory the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism's forbidden elements of the honorific and the visually pleasurable It highlights the significance of pavilionizing mid century designers such as Victor Lundy John Johansen Eero Saarinen and Edward Durrell Stone and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive in restaurants gas stations furniture and car showrooms branch banks and motels The book ties together the threads in mid century architectural theory that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism

L'architecture et la crise de la science moderne Alberto Pérez-Gómez, 1987 *Entre la fin de la Renaissance et le début du*

dix-neuvième siècle les arts antiques de l'architecture ont profondément transformés par la révolution scientifique. Cet important ouvrage qui remonte en 1984 le prix Alice Davis Hitchcock retrace le processus du remplacement des fondements mystiques et numériques de l'utilisation du nombre et de la géométrie en architecture par les motivations plus techniques et plus fonctionnelles qui prévalent dans la théorie et la pratique architecturale aujourd'hui. Le livre se rapporte aux principaux traits d'architecture des générations successives mais dans un cadre culturel plus vaste il prend aussi en compte les écrits des philosophes, des mathématiciens, des savants et des ingénieurs.

Architecture in France in the Eighteenth Century Wend Graf Kalnein, Wend von Kalnein, 1995-01-01 Architecture in France in the Eighteenth Century Wend von Kalnein French architecture of the eighteenth century which exhibited great technical ability and refined taste influenced architectural style throughout Europe. This handsome book is a survey of the French architecture of the period. It begins with the origins of the style moderne under the last years of Louis XIV, discusses the end of Rococo and the return to antiquity and concludes with the Revolutionary architecture and the house of Madame de Camille. Kalnein describes the development of palace and hotel architecture by the two great architects de Cotte and Boffrand, discussing such large urban projects as the reconstruction of Rennes and the Places Royales. He traces the return to antiquity which began when the scholars of the Académie d'Architecture were sent to Rome, the revolutionary architecture with its grand but never executed projects and the shift from neoclassicism to early romanticism. Kalnein also examines the decorative arts of the period which became even more important than architecture in the Rococo period. Focusing on such architects as Boffrand, Gabriel and Redoux, he shows how a study of their building decoration illuminates the evolution of style moderne, the battle between Rococo and Neoclassicism and the dissemination of French styles throughout Europe.

Julien-David Leroy and the Making of Architectural History Christopher Drew Armstrong, 2013-04-15 This book examines the career and publications of the French architect Julien-David Leroy 1724-1803 and his impact on architectural theory and pedagogy. Despite not leaving any built work, Leroy is a major international figure of eighteenth-century architectural theory and culture. Considering the place that Leroy occupied in various intellectual circles of the Enlightenment and Revolutionary period, this book examines the sources for his ideas about architectural history and theory and defines his impact on subsequent architectural thought. This book will be of key interest to graduate students and scholars of Enlightenment era architectural history.

The First Frame Pannill Camp, 2014-12-04 A unique account of the way architects, dramatists and philosophers transformed theatre space in the eighteenth century.

Maisons parisiennes des Lumières Youri Carbonnier, 2006 Description historique de l'univers quotidien des Parisiens entre boutiques sombres, pièges, exiguës corridors obscurs et cours discrètes, un univers qui sera en grande partie balayé par les travaux haussmanniens.

Architecture in Words Louise Pelletier, 2006-09-27 This innovative title provides an in-depth interdisciplinary study of the influence of theatre and fiction in defining character in eighteenth-century architecture, pushing current architects to rediscover the communicative aspects of their work.
