The Art of Teaching Science Jack Hassard, Michael Dias, 2013-07-04 The Art of Teaching Science emphasizes a humanistic experiential and constructivist approach to teaching and learning and integrates a wide variety of pedagogical learning tools. These tools involve inquiry and experimentation, reflection through writing and discussion, as well as experiences with students, science curriculum, and pedagogy. Becoming a science teacher is a creative process, and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers, professionals, and instructors, and through hands-on activities designed to foster a collaborative, thoughtful learning environment.

Arthropod Relationships Richard A. Fortey, Richard H. Thomas, 2012-12-06 The arthropods contain more species than any other animal group, but the evolutionary pathways which led to their current diversity are still an issue of controversy. *Arthropod Relationships* provides an overview of our current understanding, responding to the new data arising from sequencing DNA, the discovery of new Cambrian fossils as direct evidence of early arthropod history, and developmental genetics. These new areas of research have stimulated a reconsideration of classical morphology and embryology. *Arthropod Relationships* is the first synthesis of the current debate to emerge not since the volume edited by Gupta was published in 1979. Has the arthropod phylogeny debate been considered in this depth and breadth? Leaders in the various branches of arthropod biology have contributed to this volume. Chapters focus progressively from the general issues to the specific problems involving particular groups, and thence to a consideration of embryology and genetics. This wide range of disciplines is drawn on to approach an understanding of arthropod relationships and to provide the most timely account of arthropod phylogeny. This book should be read by evolutionary biologists, palaeontologists, developmental geneticists, and invertebrate zoologists. It will have a special interest for postgraduate students working in these fields.
