Agrobiodiversity and genetic erosion. Contributions in Honor of Prof. Dr. Karl Hammer ,2009 Beyond Nature and Nurture Javier Pérez-Jara,Íñigo Ongay,2025-05-28 This book gathers several of the world s leading scholars in the nature vs nurture debate offering a timely reconsideration of the dynamic interactions between physical chemical biological social and cultural factors that shape human multidimensionality Emphasizing this multidimensionality this edited volume seeks to bridge the divide between biology and social theory two research communities that have too often overlooked each other These disciplines despite being central to understanding human nature have long operated in isolation While some animal species exhibit higher degrees of phenotypic plasticity in specific traits humans stand out as the most plastic species in both their neurological and sociocultural systems This plasticity leads the contributors of this book to move beyond both biological reductionism and the blank slate hypothesis While biology undoubtedly plays a role in shaping and

stabilizing human social and cultural processes it does so only within the framework of an inherently social environment one shaped by historically contingent and socially constructed realities such as values codes and cultural perceptions More importantly cultural structures and social interactions actively shape and transform certain biological features that were once considered immutable This book lays the groundwork for a productive dialogue among biologists psychologists social theorists and philosophers It also highlights some of the moral and political consequences of different perspectives within the nature vs nurture debate Through updated scientific and philosophical theorizing the chapters in this book aim to overcome once and for all the simplistic yet persistent opposition between nature and nurture offering a far more complex and dynamic yet richer and epistemologically manageable picture of the human being *Picking up the Pieces* Mustafa

Genome-Wide Association Studies Riyan Cheng,Lide Han,Hailan Liu,Min Zhang,Guolian Kang,2021-08-24 **The Scope of Anthropology** Laurent Dousset,Serge Tcherkézoff,2012-04-01 Some of the most prominent social and cultural anthropologists have come together in this volume to discuss Maurice Godelier s work They explore and revisit some of the highly complex practices and structures social scientists encounter in their fieldwork From the nature culture debate to the fabrication of hereditary political systems from transforming gender relations to the problems of the Christianization of indigenous peoples these chapters demonstrate both the diversity of anthropological topics and the opportunity for constructive dialogue around shared methodological and theoretical models **The Medicalization of America's Schools**

Joel Macht,2017-11-08 This book challenges the validity of ADHD learning disabilities and dyslexia as meaningful special education categories and critically examines the misplaced medical model from which they are derived The presumption that these disabilities cause school related problems detracts from identifying factors within the classroom that create and

maintain a child's underachievement and disruptive behavior. Moreover, when the disability is finally named, it provides no functional information that translates into effective coping strategies. Macht delves into the misunderstood structure of these disabilities, pointing out that they are not verifiable disabilities but weak constructs that poorly describe each child's uniqueness. Finally, he provides an alternative model based on children's strengths rather than their deficiencies and presents strategies that advance school-related success.

Current Issues in Alcohol/drug Studies, 1989. In this new volume, experts focus on a number of important issues of current interest and controversy. Is alcoholism a disease or is it not? Should federal bans on drugs like heroin and cocaine be removed, and will that solve, modify, or exacerbate the problem? Can the risk for alcoholism really be predicted? Professionals from a very wide variety of disciplines—medicine and biochemistry, psychiatry and psychology, philosophy, anthropology, law, social work, and journalism—present their very differing points of view on the perception of alcoholism as a disease and on public policy issues like proposed legislative controls over alcoholic beverages.
