

3 What are Banks and Patches

- PATCH**
A combination of several effects, each with individual parameter settings is called a "patch". The 505 comes with 24 preset patches which can be changed/edited by the user.
- BANK**
The 505 calls up patches in sets of four, called a "bank".

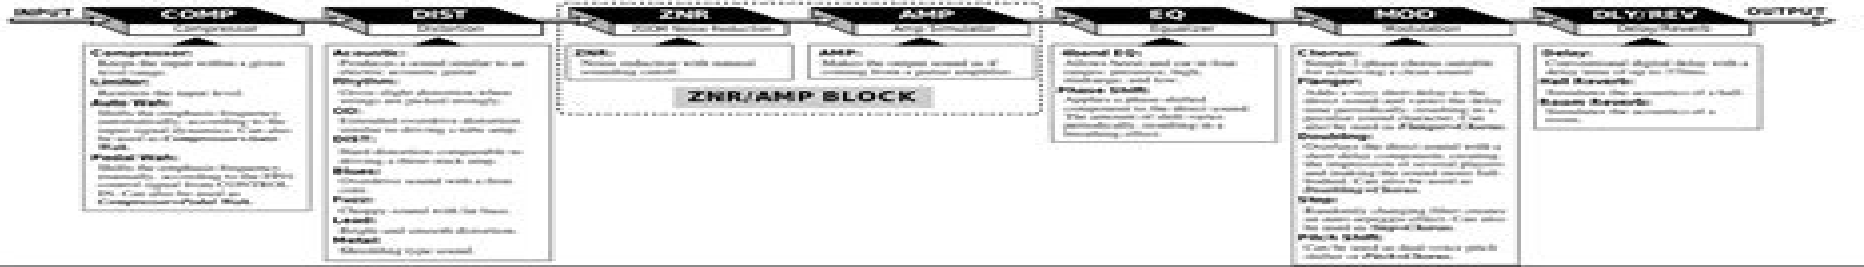

4 PATCH LIST

The 505 has memory capacity for 24 patches. At the factory, these are programmed with recommended settings. The user can freely change the contents of any patch, and it is also possible to restore the factory settings.

As shown in the illustrations below, the 505 can be thought to contain seven "effect modules" which are internally connected. In most effect modules, only one effect may be active at any given time, but the COMP and MOD modules can use two effects simultaneously. Therefore the 505 can act like a total of nine single effect devices.
