Combining Modern Communication Methods With Heritage Education Bassa, Lia,2023-03-21 Cultural heritage has tremendous importance in human development The communication of culture is determinant for society whereas that of heritage can be a driving force for individual development If cultural heritage is communicated and

incorporated into the educational development of children from the very beginning it will contribute to the formation of their entire lives and sustainable social development Combining Modern Communication Methods With Heritage Education provides relevant theoretical frameworks and the latest empirical research findings in the area It shows that heritage related to information provision is to be started at a very early age and continued by schools and later educational forms Covering topics such as cultural heritage world heritage education and indigenous archives this premier reference work is an essential resource for educators and administrators of both K 12 and higher education pre service teachers teacher educators sociologists anthropologists business leaders and executives marketers librarians researchers and academicians Housing the Poor on the African Continent Mfundo Mandla Masuku, Oliver Mtapuri, Primrose Thandekile Sabela, Nomusa M. Mlondo, 2022-10-13 This book explores the circumstances surrounding state provided low cost housing for people at the lower end of the housing market in Africa It deploys Ubuntu philosophy to unpack the provision of housing security to citizens arguing that interpreting housing rights within Ubuntu philosophy recognises the spirit of reciprocity and collective solidarity as fundamental to meeting the housing needs of low income groups In essence the volume reflects on the values of Ubuntu and informs both policy and practice by guiding policymakers researchers and practitioners with the episteme of basic human rights and the Ubuntu philosophy It pointedly grapples with issues that resonate with efforts by African governments to protect vulnerable citizens from multidimensional poverty homelessness gender neutral policies and self help housing schemes The book s insights raise red flags concerning the realisation of Ubuntu as a vehicle earmarked to deliver adequate and sustainable housing delivery outcomes The volume is a must read for academics researchers practitioners government officials and leaders from various sectors *Cross-Disciplinary Approaches to Action Research and Action Learning* Mapotse, Tome Awshar, 2017-07-31 The complexity of 21st century lifestyle makes collaborative research and learning essential for all of the population both in well resourced and socio economically challenged regions Cross Disciplinary Approaches to Action Research and Action Learning is an advanced reference source including the latest scholarly research on the examination of the development of a community practice of research in order to improve problem solving in various fields Featuring extensive coverage on a broad range of topics such as social justice organizational development and global economy this publication is ideally designed for academics researchers scholars and managers seeking current research on the promotion of collaborative research and learning South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable

distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
