

National Student Financial Aid Scheme (NSFAS)

NSFAS is a **government loan scheme**, with the added incentive of a bursary conversion (maximum of 40%) depending on academic performance.

- If you do well, 40% of this can be converted to a bursary!!
 - If you fail, you will have to pay back EVERYTHING!
-
- **Academically deserving and financially needy students** have the opportunity to apply for a loan from NSFAS, part of which can be converted to a bursary, subject to academic results.
 - Loans do not always cover tuition fees and other study costs in full. The amount of the loan is determined, among other things, by the family's financial need and the student's cost of study.
 - Application forms available online: www.nsfas.org.za

This book examines the ways in which universities can play a crucial role in inclusive development, social innovation, and social entrepreneurship. It aims to prove the importance of inclusive development and inclusive innovation on economic growth and demonstrate the ways in which universities can be pioneers in this area through initiatives in social responsibility and social innovation. For example, providing access to a university education without discrimination of race, gender, income status, or other factors would help to diminish the increasing income differentials currently being experienced in many countries, especially in the developing world. The research and studies included in this book provide insight into possible actions that can be taken by universities and public and private shareholders in inclusive development, social innovation, social entrepreneurship, and overall regional economic and social development. Innovation is currently considered to be the most important and dynamic factor explaining growth and development. At the same time, the traditional view

considering innovation as having to be commercialized at any price is being challenged. Lately there has been growing interest in innovation in the public sector particularly with respect to social innovations designed to reduce income inequality. To address these concepts constant exchange of ideas and information between research groups became necessary. UniDev Universities in Development the Evolving Role of Academic Institutions in Innovation Systems and Development is an international research group with researchers in twelve countries interested in the role of universities in development. This book features the results of research performed by eleven research groups from UniDev country communities presenting in depth and comparative case studies from universities around the world including Latin America Northern and Eastern Europe and sub Saharan Africa. This title will be of interest to students academics researchers and policy makers interested in the role of universities in development social innovation and social entrepreneurship. *Transforming Universities in South Africa*, 2020-08-31. The idea of transformation in higher education underpins all policy documents academic literature and on going debates in South Africa. *Transforming Universities in South Africa Pathways to Higher Education Reform* responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa's higher education stands across the continent and globally particularly within the country's efforts to overcome decades of socio economic imbalances. It addresses the question of whether South Africa's transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally. This volume's ultimate purpose is to provide a basis for imagining new futures in which South Africa higher education in the context of Africa and the global world takes centre stage. *From School to Higher Education?* Michael Cosser, Jacques Du Toit, 2002. This substantive report is essential reading for those involved in higher education planning and policy making.
