*Social Work in Social Change* Nicci Earle, 2008 This study forms part of a series of studies on professions and professional education being conducted by the HSRC's research programme on Education Science Skills Development. It follows a pilot study on medical doctors published in 2006 entitled *Doctors in a Divided Society*. The profession and education of medical practitioners in South Africa. Like the other studies in the series, this study involved developing an understanding of the professional milieu and professional labour market of social workers. As the implementers of government social policy, social work professionals have been at the forefront of grappling with the practicalities of the changes in focus, approach and methods of social security and social service delivery since 1994. It examines developments in the education and training of social workers within the democratic dispensation, the most significant of which is the development of a national standardised Bachelor of Social Work degree. The study also reveals that the dominant profile in student enrolment and graduation statistics has changed from white female to African female and that enrolment has increased significantly. However, the study also shows that graduation trends have been negative and losses due to emigration are an additional concern. Given the scarcity of these professionals against the demand for their services, understanding the factors that contribute to this picture are critical to effective intervention. **Academics for Student Success** Dr Johann Hugo, 2021-04-26 This book is essential for academics that enter the field of higher education and training as it focuses on preparing teachers and trainers to respond appropriately to student success challenges. Student success is a burning issue both globally and locally. While student achievement is determined by a combination of factors, teachers and their teaching practices do matter. Higher education teachers are expected to fulfil different roles at different times, such as planning for curriculum implementation, mentorship and coaching, facilitating learning, resource development and student assessment. Against this background, the primary purpose of *Empowering novice academics for student success* is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughout. **Financing Higher Education Worldwide** D. Bruce

Johnstone, Pamela N. Marcucci, 2010-06-07 Examines the universal phenomenon of cost sharing in higher education where financial responsibility shifts from governments and taxpayers to students and families. Growing costs for education far outpace public revenue streams that once supported it. Even with financial aid and scholarships defraying some of these costs, students are responsible for a greater share of the cost of higher education. Shows how economically diverse countries all face similar cost sharing challenges. While cost sharing is both politically and ideologically debated, it is imperative to implement it for the financial health of colleges and universities. From publisher description Youth and Higher Education in Africa. The Cases of Cameroon, South Africa, Eritrea and Zimbabwe Donald P. Chimanikire, 2009 Student activism in Africa at least since the early 1990s has been preoccupied with popular struggles for democracy in both their respective

countries and institutions of higher learning The changing socio economic and political conditions in many African countries characterized by the decline in economic growth and the introduction of multi party politics among several other factors have had different impact on students and student political organizations in African universities This book recounts the responses of students to these changes in their attempt to negotiate better living and studying conditions The four case studies contained in the book Cameroon South Africa Zimbabwe and Eritrea clearly reveal the very important aspects of the situation in which African students find themselves in many countries and underscores the need to understand the character and development of higher education on the continent Ministries of Higher Education Vice Chancellors Deans of Students Student Unions and parents will find this book very useful in terms of understanding the tensions that often arise at institutions of higher learning and why solutions seem to be elusive
