THE HUMAN NUTRITION AND DIGESTIVE SYSTEM

By Daniella Quarkey

Hello, you are welcome to the human nutrition and digestive system presentation.

On this topic, I will explain the structures and functions of the digestive system, mechanical and chemical digestions and finally talk about the constituent of a balanced diet.

STRUCTURES AND FUNCTIONS OF THE DIGESTIVE SYSTEM

(Anatomy, 2022)

According to (Cleveland Clinic, 2021) "Your digestive system is uniquely constructed to do its job of turning your food into the nutrients and energy you need to survive". And when it is done with that, it handily packages your solid waste, or stool, for disposal when you have a bowel movement. According to (Vedantu, 2022) "Digestion could be described as the process by which the food we eat passes through our bodies and are directed towards the purposes of providing the body with energy or building new cellular components and tissues, such as muscle or fat while absorption is the process of taking digested simple molecules into the bloodstream".
