Phytoremediation and Biofortification Nand K. Singh, Shadma Afzal, Tariq Aftab, 2024-02-06 For sustainable environmental management as a whole the roles of phytoremediation and biofortification as two sides of the same coin must be highlighted. Phytoremediation is a process in which biological organisms are used to eliminate or nullify an environmental pollutant by a metabolic course of action. Biofortification in contrast is an agrarian process that enhances the micronutrient content of a food crop through plant breeding, genetic modification, use of enriched fertilizers or management of agricultural practices. These two strategies although targeting different objectives both work on the same principle of the bio-extraction process that involves uptake, accretion, removal and modification of micro and macro nutrient elements from the soil. This volume offers a comprehensive overview of phytoremediation and biofortification of Zn, Fe, Cu and Cd etc and illustrates the emerging and innovative combination of these technologies. With chapters written by experts the book highlights a wide range of topics and discusses the integration of advanced phytoremediation and biofortification approaches for sustainable ecological and health management. Topics include phytoremediation and biofortification strategies that use nanotechnology, algae, fungi and other plants, CRISPR/Cas9 mediated genome engineering and more for decontamination of water and soil and for fortifying plants against climate change, toxic chemicals and other challenges. Key features: reviews and integrates the currently available information on phytoremediation and biofortification from molecular, biochemical and physiological levels; provides a direction towards implementation of programs and practices to enable the sustainable production of crops resilient to climatic alterations. This volume will be valuable for investigators who are working or have an interest in sustainable environmental management as well as for research students, teachers, scientists and engineers whether in academia, industry or government and those who have an interest in environmental remediation and micronutrient fields.

Biotechnological Advances in Horticultural Crops Ajay Kumar Thakur, Pankaj Kumar, Dinesh Kumar Srivastava, 2024-12-02 The field of horticultural biotechnology has witnessed remarkable growth in recent years offering profound insights and innovations that are reshaping agriculture's future. *Biotechnological Advances in Horticultural Crops* serves as a comprehensive guide to the latest innovations and applications. This meticulously curated volume bridges the gap between fundamental knowledge and cutting edge advancements. From plant tissue culture to genomic approaches this book spans a diverse array of topics catering to a broad audience of students, researchers and academics. Key Features: In depth exploration of plant tissue culture and its applications in horticultural crop improvement. Insightful coverage of transgenic approaches in fruit crops including genetic modifications for enhancing fruit quality, yield and resistance to pests and diseases. Detailed examination of the application of omics sciences in tropical fruits opening up new perspectives for crop improvement and sustainable production.

Extensive discussion on the potential of in vitro production techniques for underutilized and unconventional horticultural crops Exploration of sustainable agriculture practices including the use of beneficial microbes and the scientific validation of natural and organic farming practices This book is more than just a collection of topics it s a gateway to the transformative potential of biotechnology in horticulture It empowers readers students researchers and academicians to comprehend and harness these advancements promoting innovation and sustainability in horticultural crop improvement **Achieving**

sustainable cultivation of tree nuts Prof Ümit Serdar, Emeritus Prof. Dennis Fulbright, 2019-07-26 Reviews current research on the nutraceutical properties as well as allergen and other safety issues relating to tree nuts Assesses advances in breeding cultivation integrated disease and pest management to improve yields and sustainability Summarises key research on the main tree nuts from walnuts and almonds to hazelnuts chestnuts and pistachios Alzheimer's Disease and Advanced Drug Delivery Strategies Bhupendra G. Prajapati, Dinesh Kumar Chellappan, Prakash Kendre, 2023-11-30 Alzheimer s Disease and Advanced Drug Delivery Strategies compiles under a single volume the most recent advances in drug delivery to the brain as related to AD treatment The editors recruited scientists from around the world to produce high quality chapters covering not only nanotechnological approaches but also microsphere niosomes and liposomes Among the topics covered are synthetic molecules nobiletin nose to brain delivery natural biomaterials cationic nanoformulations dendrimers microbubbles and more Alzheimer s Disease and Advanced Drug Delivery Strategies is a complete reference for academic and corporate pharma researchers investigating targeted drug delivery to the brain Medical Health Sciences researchers would also benefit from understanding the strategies compiled under this volume Provides insights into how advanced drug delivery systems can be effectively used for the management of Alzheimer s disease Includes the most recent information on diagnostic methods and treatment strategies using controlled drug delivery systems Covers recent perspectives and challenges towards the management and diagnosis of Alzheimer s Disease **Collimator-Based Tracking with an Add-On Multileaf**

Collimator Andreas Böhler, 2015-09-29 In this thesis a tracking system was developed by modifying an add on collimator the Siemens Moduleaf for realtime applications in radiotherapy As the add on collimator works almost completely autonomously of the linear accelerator LinAc no modifications to the latter were necessary The adaptations to the Moduleaf were mainly software based In order to reduce the complexity of the system outdated electronic parts were replaced with newer components where practical Verification was performed by measuring the latency of the system as well as the impact on applied dose to a predefined target volume moving in the leaf s travel direction Latency measurements in software were accomplished by comparing the target and current positions of the leaves For dose measurements a Gafchromic EBT2 film was placed beneath the target 4D phantom in between solid water plates and moved alongside with it Based on the results a tracking capable add on collimator seems to be a useful tool for reducing the margins for the treatment of small slow moving targets Radiotherapy is one of the most important methods used for the treatment of cancer Irradiating a moving target is
