

### DIVIDEND

Dividend seems as income to shareholders

Is important subject in CF / AFM.

A company would always want to give as much as possible back to its shareholders by paying dividend or/ it can invest the money for its shareholders, instead of paying it out.

Dividend refers to the total returns paid annually as expected by shareholders. Shareholders expects to receive dividends regularly as well as increasing in stock price.

What is effect of dividend.

#### 1. EAT

- Dividend is paid out of a firm's earning after tax. If the Net Y is higher, dividend may be higher. If the net after tax is less, as investor may get less dividend.

- however, a firm may pay a certain % out of EAT, as dividend are paid from the remainder of the Net Y and used as the reinvestment as a internal capital sources.

#### 2. FIRM'S LIFE CYCLE

- how much dividend is to be paid also depends on the life cycles of the firms. During the early stage, firm may face substantial capital needs to support growth. Therefore, the proportion of dividends paid will be small, if the firm is already at the maturity stage where there is stable finance, the firm may use all all profit that are obtained and distribute them to the shareholders.
