

Design Your Own Periodic Table

Project Goal

Create a "Periodic Table" which demonstrates how objects we use every day, topics we discuss, foods we eat, and more, contain characteristics which allow us to group them using different patterns.

Project Guidelines

Where to begin:

1. Choose a topic that has characteristics that can be categorized in at least two different ways. Good characteristics to look at may be, but are not limited to: dates, colors, cost, company, size, genre or any physical or chemical properties that can divide the subject into various groups and periods. Be creative!!
2. Decide upon and research these particular characteristics. Organize the item vertically and horizontally to show a pattern or relationship. Your periodic table must contain a minimum of 20 elements, arranged in a minimum of 5 groups and 4 periods (or the reverse). Not every space within a group or period needs to be filled. You must have a title for your groups and periods.
3. Each "element" on your periodic table must include:
 1. Element Name
 2. Chemical Symbol (1 or 2 letters)
 3. Atomic Number – arrange the elements first then number them. blank spaces must include a number!
 4. Atomic Mass – some numeric characteristic of the element, that must increase as you go down and across the table (size, style, cost, etc.)
 5. Picture of element.
4. A "Key" is required for the information given for each "element" on the periodic table by drawing a sample square with sample information, and label what characteristic each piece of information represents.
5. The final copy of you periodic table may be on paper or poster board.
6. Title your periodic table at the top. Put your names and class period on the front of your table, so they may be seen when displayed.

IB unit 1 project Design Your Own Periodic Table Questions

All answers must be in complete sentences. Answer the questions completely with detailed explanations and examples for full credit. (Attach Completed Questions to your final periodic table project.

1. How is your Periodic Table similar to the Periodic Table of Elements? (Address Periods, Groups and Trends in your response.)
2. What flaws or mistakes are there in your table?
3. If you were to make your Periodic Table again, what changes would you make and explain why you would make those changes.
