Devry University Assessment Test:

Conflicting Stakeholders in Higher Education Assessment H. Russell Searight, 2024-08-28 Assessment requirements in universities have become nearly universal Evaluation efforts typically focus on documenting student and program learning outcomes Despite being framed as tools for enhancing educational quality decades of assessment efforts suggest that this goal is not being met This critique is contextualized within broader social historical shifts in higher education pointing out how assessment practices have paralleled trends toward corporatization and heightened administrative oversight Many assessment professionals adopted methodologies from behavioural science and educational measurement while neglecting essential measurement principles resulting in data quality issues Existing assessment measures often exhibit questionable reliability and validity undermining their effectiveness This book suggests that the prevalent summative approach to course objectives may not be the best method for improving instruction or assessing student learning Alternatives such as research derived from the Scholarship of Teaching and Learning and qualitative formative assessments may yield more meaningful quality driven information

Remaking College Mitchell Stevens, Michael W. Kirst, 2015-01-07 Between 1945 and 1990 the United States built the largest and most productive higher education system in world history Over the last two decades however dramatic budget cuts to public academic services and skyrocketing tuition have made college completion more difficult for many Nevertheless the democratic promise of education and the global competition for educated workers mean ever growing demand Remaking College considers this changing context arguing that a growing accountability revolution the push for greater efficiency and productivity and the explosion of online learning are changing the character of higher education Writing from a range of disciplines and professional backgrounds the contributors each bring a unique perspective to the fate and future of U S higher education By directing their focus to schools doing the lion s share of undergraduate instruction community colleges comprehensive public universities and for profit institutions they imagine a future unencumbered by dominant notions of traditional students linear models of achievement and college as a four year residential experience The result is a collection rich with new tools for helping people make more informed decisions about college for themselves for their children and for American society as a whole
