vertebrates fishes and reptiles the deep sea floor Cetacean Societies Janet Mann, 2000-06 Part review part testament to extraordinary dedication and part call to get involved Cetacean Societies highlights the achievements of behavioral ecologists inspired by the challenges of cetaceans and committed to the exploration of a new world from the preface by Richard Wrangham Long lived slow to reproduce and often hidden beneath the water s surface whales and dolphins cetaceans have remained elusive subjects for scientific study even though they have fascinated humans for centuries Until recently much of what we knew about cetaceans came from commercial sources such as whalers and trainers for dolphin acts Innovative research methods and persistent efforts however have begun to penetrate the depths to reveal tantalizing glimpses of the lives of these mammals in their natural habitats Cetacean Societies presents the first comprehensive synthesis and review of these new studies Groups of chapters focus on the history of cetacean behavioral research and methodology state of the art reviews of information on four of the most studied species bottlenose dolphins killer whales sperm whales and humpback whales and summaries of major topics including group living male and female reproductive strategies communication and conservation drawn from comparative research on a wide range of species Written by some of the world s leading cetacean scientists this landmark volume will benefit not just students of cetology but also researchers in other areas of behavioral and conservation ecology as well as anyone with a serious interest in the world of whales and dolphins Contributors are Robin Baird Phillip Clapham Jenny Christal Richard Connor Janet Mann Andrew Read Randall Reeves Amy Samuels Peter Tyack Linda Weilgart Hal Whitehead Randall S Wells and Richard Wrangham **Habitats and Biota of the Gulf of Mexico:**

Before the Deepwater Horizon Oil Spill C. Herb Ward, 2017-06-26 This book is open access under a CC BY NC 2.5 license

The Gulf of Mexico is an open and dynamic marine ecosystem rich in natural resources but heavily impacted by human activities including agricultural industrial commercial and coastal development The Gulf of Mexico has been continuously exposed to petroleum hydrocarbons for millions of years from natural oil and gas seeps on the sea floor and more recently from oil drilling and production activities located in the water near and far from shore Major accidental oil spills in the Gulf are infrequent two of the most significant include the Ixtoc I blowout in the Bay of Campeche in 1979 and the Deepwater Horizon Oil Spill in 2010 Unfortunately baseline assessments of the status of habitats and biota in the Gulf of Mexico before these spills either were not available or the data had not been systematically compiled in a way that would help scientists assess the potential short term and long term effects of such events This 2 volume series compiles and summarizes thousands of data sets showing the status of habitats and biota in the Gulf of Mexico before the Deepwater Horizon Oil Spill Volume 2 covers historical data on commercial and recreational fisheries with an analysis of marketing trends and drivers ecology populations and risks to birds sea turtles and marine mammals in the Gulf and diseases and mortalities of fish and other animals that inhabit the Gulf of Mexico

Applied Mathematical Demography Nathan Keyfitz, Hal Caswell, 2005-11-14 Focuses on applications of demographic models This book introduces the life table to describe age specific mortality and uses it to develop theory for stable populations and the rate of population increase This theory is then revisited in the context of matrix models for stage classified as well as age classified populations
