CELL TRANSPORT REVIEW

CHAPTER 7-3

Match the definition on the left with the term on the right.

1. d release of wastes or cell products from inside to outside a cell
2. e diffusion of water molecules through a selectively permeable membrane
3. f loss of water from a cell resulting in a drop in turgor pressure
4. c continuous movement of particles but no overall change in concentration
5. b movement of particles from an area of higher concentration to one of lower concentration
6. a structure inside protists (paramecium) that collects excess water and squeezes it outside through the membrane

- a. contractile vacuole
- b. diffusion
- c. dynamic equilibrium
- d. exocytosis
- e. osmosis
- f. plasmolysis

In the space at the left, write true if the statement is true. If the statement is false, change the italicized term to make the statement true. Write this answer in the blank provided.

7. A solution in which the concentration of dissolved substances is lower than the concentration inside a cell is *hypertonic*.
hypotonic True
8. The internal pressure of a plant cell is called *turgor pressure*.
Active transport True
9. In *passive transport*, the movement of particles across a membrane requires energy.
Facilitated diffusion True
10. *Endocytosis* is a process by which a cell membrane surrounds and takes in material from the environment.
11. The passive transport of material across a membrane by means of transport proteins is called *activated diffusion*.
12. A membrane that allows only some materials to pass through shows *selective permeability*.

Write the word or phrase that best completes the statement or answers the question.

1. The structure most responsible for maintaining cell homeostasis is the cytoplasm cell wall mitochondria plasma membrane
2. A plasma membrane is made up of a(n) cholesterol layer enzyme layer lipid bilayer protein layer
3. Which of the following is not a form of passive transport? facilitated diffusion diffusion endocytosis osmosis
4. Diffusion continues until equilibrium is reached turgor pressure is reached one side has more
5. If a cell is placed in salt water, water leaves the cell by osmosis diffusion active transport phagocytosis
6. If it is not watered, a tulip plant wilts because it loses turgor pressure increases turgor pressure
7. A cell moves particles from a region of lesser concentration to a region of greater concentration by facilitated diffusion osmosis passive transport active transport

Indoleamine 2,3-dioxygenase IDO1 is an ancestral enzyme that initially confined to the regulation of tryptophan availability in local tissue microenvironments is now considered to play a wider role that extends to homeostasis and plasticity of the immune system Thus IDO biology has implications for many aspects of immunopathology including viral infections neoplasia autoimmunity and chronic inflammation Its immunoregulatory effects are mainly mediated by dendritic cells DCs and involve not only tryptophan deprivation but also production of kynurenines that act on IDO DCs thus rendering an otherwise stimulatory DC capable of regulatory effects as well as on T cells The aryl hydrocarbon receptor AhR is a ligand operated transcription factor originally recognized as the effector mediating the pathologic effects of dioxins and other pollutants However it is now well established that AhR activation by endogenous ligands can produce immunoregulatory effects The IDO1 mechanism appears to have been selected through phylogenesis primarily to prevent overreacting responses to TLR recognized pathogen associated molecular patterns and only later did it become involved in the response to T cell receptor recognized antigens As a result in mammals IDO1 has become pivotal in fetomaternal tolerance at a time when regulatory T cells emerged to meet the same need namely protecting the fetus IDO1 and regulatory T Treg cells may have then coevolved to broaden their function well beyond their initial task of protecting the fetus such that in acquired immunity IDO1 with its dual enzymic and signaling function has turned into an important component of the peripheral generation and effector function of regulatory T cells AhR in turn which has a role in regulatory T cell generation is presumed to have evolved from invertebrates where it served a ligand independent role in normal development processes Evolution of the receptor in vertebrates resulted in the ability to bind structurally different ligands including xenobiotics and microbiota derived catabolites Considering the inability of invertebrate AhR homologs to bind dioxins the adaptive role of the AhR to act as a regulator of xenobiotic metabolizing enzymes may have been a vertebrate innovation to later acquire an additional immune regulatory role by coevolutionary pressure in mammals by IDO1 and regulatory T cells Thus an entirely new paradigm in immunology and more specifically in immune tolerance is the coevolution of three systems namely the IDO1 mechanism AhR driven gene transcription and T cell regulatory activity that originating from the initial need of protecting the fetus in mammals have later turned into a pivotal mechanism of peripheral tolerance in autoimmunity transplantation and neoplasia

Directed Reading 8 2 Section Cell Transport Answer Key Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Directed Reading 8 2 Section Cell Transport Answer Key PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability.
