statistics using the freely available R software **Discovering Statistics Using SAS** Andy Field,Jeremy Miles,2010-01-30
Hot on the heels of the 3rd edition of Andy Field's award winning *Discovering Statistics Using SPSS* comes this brand new version for students using SAS. Andy has teamed up with a co-author Jeremy Miles to adapt the book with all the most up to date commands and programming language from SAS 9.2. If you're using SAS this is the only book on statistics that you will need. The book provides a comprehensive collection of statistical methods, tests and procedures covering everything you're likely to need to know for your course, all presented in Andy's accessible and humorous writing style. Suitable for those new to statistics as well as students on intermediate and more advanced courses, the book walks students through from basic to advanced level concepts all the while reinforcing knowledge through the use of SAS. A cast of characters supports the learning process throughout the book, from providing tips on how to enter data in SAS properly to testing knowledge covered in chapters interactively. Real world and invented examples illustrate the concepts and make the techniques come alive. The book's companion website (see link above) provides students with a wide range of invented and real published research datasets. Lecturers can find multiple choice questions and PowerPoint slides for each chapter to support their teaching.

Discovering Statistics Using IBM SPSS Statistics Andy Field,2017-11-14 With an exciting new look, new characters to meet and its unique combination of humour and step by step instruction, this award winning book is the statistics lifesaver for everyone. From initial theory through to regression, factor analysis and multilevel modelling, Andy Field animates statistics and SPSS software with his famously bizarre examples and activities. What's brand new? A radical new design with original illustrations and even more colour. A maths diagnostic tool to help students establish what areas they need to revise and improve on. A revamped online resource that uses video, case studies, datasets, testbanks and more to help students negotiate project work, master data management techniques and apply key writing and employability skills. New sections on replication, open science and Bayesian thinking. Now fully up to date with latest versions of IBM SPSS Statistics. All the online resources above, video case studies, datasets, testbanks can be easily integrated into your institution's virtual learning environment or learning management system. This allows you to customize and curate content for use in module preparation, delivery and assessment. Please note that ISBN 9781526445780 comprises the paperback edition of the Fifth Edition and the student version of IBM SPSS Statistics.

Prison Workers' Perception of Self-legitimacy, Relations, and Professional Competencies Rok Hacin,Gorazd Meško,2025-05-23 This book dives deep into the intricate realm of prison workers' self-legitimacy within Slovenia's non-Western prison system. It uncovers how their perceptions of authority significantly influence their interactions with prisoners, especially regarding different approaches to treatment of prisoners, including the use of force. Unlike traditional Western models, this study adapts to the unique challenges present in Slovenian prisons, offering fresh insights and approaches. Through a longitudinal study comparing data from 2016 to 2022, the book illuminates the evolving nature of self-legitimacy among prison workers, shedding light on the impact of changing social contexts. It provides

a bridge between theoretical understanding and practical application contributing valuable knowledge to the fields of criminology and penology The chapters that follow include comprehensive discussions on theoretical frameworks methodological intricacies and the practical implications of these findings for Slovenia s penal system Ultimately this book serves as an indispensable resource for those interested in understanding and improving the dynamics of authority and legitimacy within correctional environments

[The Evolution of Religion and Morality](#) Benjamin Grant Purzycki, Joseph Henrich, Ara Norenzayan, 2023-12-04. This volume assesses the role of religion in cooperation and prosocial behaviour using ethnographic and experimental methods across eight different field sites. The first of two volumes presents results from the first phase of the Evolution of Religion and Morality (ERM) Project. Using a unique combination of both experimental and ethnographic methods, the ERM project addresses pressing questions from the burgeoning cultural evolutionary sciences of religion: What is the relationship between religious beliefs and cooperation? When people are committed to punitive knowledgeable and morally concerned gods, are they more inclined to behave prosocially towards others? How far does this prosociality extend? Do important individual and contextual factors mediate this relationship? In addition to an omnibus report, this book offers seven site-specific reports that contextualize experimental and ethnographic data collected around the world: Collecting data from communities as diverse as the Hadza of Tanzania, villagers from two communities on Tanna Island, Vanuatu residents of Maraj, Brazilians, Fijians from Yasawa and Lovu, Tyvans from southern Siberia, and Mauritians. This ground-breaking work sets a new standard in the scientific study of religion. The Evolution of Religion and Morality Volume I will be a key resource for scholars and researchers of religious studies, human evolutionary biology, psychology, anthropology, the cultural evolution of religion, and the sociology of religion. This book was originally published as a special issue of *Religion, Brain & Behavior*.

Periglacial Preconditioning of Debris Flows in the Southern Alps, New Zealand Katrin Sattler, 2016-06-11. This thesis represents one of the few studies so far that systematically analyses environmental conditions within debris flow source areas to determine their relative importance for debris flow development. Environmental site conditions such as slope gradient and debris availability influence the spatial and temporal distribution of debris flows in high alpine areas. However, current understanding of these preconditioning controls is mostly qualitative and inadequate for debris flow hazard assessments and climate change impact studies. The author's research investigates the role of frost weathering and permafrost in the occurrence of debris flows in the Southern Alps of New Zealand. Analyses are based on an extensive debris flow inventory documenting debris flow occurrence and activity over the last 60 years in selected catchments. Debris flow activity is compared to frost weathering intensity estimates from two models, allowing the practical comparison of two competing frost weathering hypotheses currently discussed in literature. Information on permafrost occurrence is based on a new distributed permafrost estimate for the Southern Alps derived from climatic conditions at active rock glacier sites. This pioneering thesis provides empirical evidence that frost weathering promotes debris flow formation. It further highlights the potential and limitations of regional scale studies for advancing our understanding of debris flow preconditioning factors.

Food Science, Production, and Engineering in Contemporary Economies Jean-Vasile, Andrei, 2016-05-12. As the population of the world continues to surge upwards, it is apparent that the global economy is unable to meet the nutritional needs of such a large populace.
