in order to complete the gear changing process namely the synchronization process Then quality factors are indenti ed and their e ect on the performance and thus synchronizer e ciency In this project a model of the manual transmission synchronizer is developed It is divided into eight di erent phases corresponding to di erent events in the process Only the rst three phases have been implemented in Matlab and simulated with di erent values of some design parameters in order to analyze the reponse The results show a good qualitative agreement with the literature
