Annual Plant Reviews, Plant Hormone Signaling Peter Hedden, Stephen G. Thomas, 2008-04-15 Plant growth is regulated by developmental programmes that can be modified by environmental cues acting through endogenous signaling molecules including plant hormones This volume provides an overview of the biosynthesis catabolism perception and signal transduction of the individual hormone classes followed by chapters on hormone distribution and transport and the roles of hormone signaling in specific developmental processes Particular attention is paid to the regulation of hormone signaling by environmental and developmental cues sites of hormone metabolism and action and interactions between hormone signaling pathways The book is directed at researchers and professionals in plant biochemistry and molecular biology

Annual Plant Reviews, The Plant Hormone Ethylene Michael T. McManus, 2012-02-08 The plant hormone ethylene is one of the most important being one of the first chemicals to be determined as a naturally occurring growth regulator and influencer of plant development It was also the first hormone for which significant evidence was found for the presence of receptors This important new volume in Annual Plant Reviews is broadly divided into three parts The first part covers the biosynthesis of ethylene and includes chapters on S-adenosylmethionine and the formation and fate of ACC in plant cells The second part of the volume covers ethylene signaling including the perception of ethylene by plant cells CTR proteins MAP kinases and EIN2 EIN3 The final part covers the control by ethylene of cell function and development including seed development germination plant growth cell separation

fruit ripening senescent processes and plant pathogen interactions The Plant Hormone Ethylene is an extremely valuable addition to Wiley Blackwell's Annual Plant Reviews With contributions from many of the world's leading researchers in ethylene and edited by Professor Michael McManus of Massey University this volume will be of great use and interest to a wide range of plant scientists biochemists and chemists All universities and research establishments where plant sciences biochemistry chemistry life sciences and agriculture are studied and taught should have access to this important volume
