Houghton Mifflin Reflections 6th Grade Social Studies:

Reading Across International Boundaries Roger Openshaw, Janet Soler, 2007-06-01 Reading Across International Boundaries edited by Roger Openshaw and Janet Soler clearly demonstrates these broader characteristics of debates about the teaching of reading It sets the educational issues firmly in the context of the social cultural and political dynamics that inform and animate them and give them their meaning It does so by setting out to understand their historical and comparative dimensions Establishing the historical context highlights the origins and also the longevity of the problems and conflicts that are now widely familiar The comparative approach also gives purchase on the wide range of approaches taken to these issues in nations around the world More than this however this collection takes us into the realm of international influences It underlines how debates in this area are not simply national but are international and global in their scale Moreover this is the case not only in relation to the broad fabric of policy debate but also in the everyday struggles of pupils parents and teachers in schools classrooms and homes Such an agenda is unsettling and provocative It has the potential to challenge received opinion to hustle preconceptions It may also propose alternative visions for the improvement of teaching in this area that might be taken up and taken seriously in different localities or even more broadly Most of all it enables us to enrich and broaden our understanding of the learning and the teaching of reading at a time when awareness and vision are sorely needed This collection of articles by leading scholars based in several different countries will be a significant contribution to the research field but also a major resource when put to good use by policy makers and practitioners as it should surely be

California in a Time of Excellence James Andrew LaSpina, 2009-02-26 Follows California's efforts at reforming the public school system from 1983 to the present

Social Studies Review, 2005

The Visual Turn and the Transformation of the Textbook James A. LaSpina, 2014-04-04 Is the emerging digital multimedia culture of today transforming the textbook or forever displacing it As new media of transmission enter the classroom the traditional textbook is now caught up in a dialogue reshaping the textual boundaries of the book and with it the traditional modes of cognition and learning which are bound more to language than to visual form Most of the important work in the past two decades in the field of curriculum has focused on the culture of the textbook A rich literature has evolved around textbooks as the traditional object of instructional activity This volume is an important contribution to this literature which focuses on the actual making of a textbook This design process serves as a metaphor that suggests new paradigms of learning and instruction in which text content is but one component in a multidimensional information space The Visual Turn is an exploration along the border of this new learning space transforming the traditional center of instruction in the classroom

The Global Education Movement Toni Fuss Kirkwood-Tucker, 2018-01-01 The pages of this book paint a portrait of thirteen scholars and their lifelong professional accomplishments in and contributions to teaching service and research in global international education around the world Their extraordinary work contributed extensively to the development

direction and growth of the global education movement in the United States initiated by James M Becker as Director of School Services for the Foreign Policy Association New York City in the 1960s These scholars were honored with the Distinguished Global Scholar Award presented by the International Assembly of the National Council for the Social Studies the largest professional organization for social studies educators in the United States Their narratives comprise an intriguing mosaic of backgrounds scholarship and contexts from which their extraordinary work blossomed in building bridges not walls among peoples and nations The publication is intended to honor the professional achievements in global international education of these scholars who have devoted their professional lives to creating a better world through their work More importantly this book exposes globally minded individuals educators scholars administrators and policymakers around the world to empowering role models from Africa Europe and the United States and opportunity to learn about the multitude of professional activities teachings partnerships exchange programs and research in which they might engage to promote a deeper understanding about the cultural geographic economic social and technological interconnectedness of the world and its people the very purpose of global education **Teaching U.S. History Beyond the Textbook** Yohuru R. Williams, 2008-11-11

Written by a history educator this exciting guide provides a unique approach that makes it easy for middle and high school teachers to engage students critical thinking in history and social studies Using a CSI approach to history the author s six powerful strategies tap into students natural curiosity and investigative instincts Students become detectives of the past as they ghost hunt in their neighborhoods solve historical crimes prepare arguments for famous court cases and more Each ready to use technique Demonstrates how students can use primary and secondary sources to solve historical mysteries Includes sample lessons and case studies for Grades 5 12 Aligns with national standards making the book useful for both teachers and curriculum developers Features review questions reflections and Web and print resources in every chapter for further reading Incorporate these strategies into your classroom and watch as students discover just how thrilling and spine chilling history can be Book jacket **Doing History** Linda S. Levstik, Keith C. Barton, 2011-01-26 Now in its fourth edition this popular text offers a unique perspective on teaching and learning history in the elementary and middle grades Through case studies of teachers and students in diverse classrooms and from diverse backgrounds it shows children engaging in authentic historical investigations often in the context of an integrated social studies curriculum The central assumption is that children can engage in valid forms of historical inquiry collecting and data analysis examining the perspectives of people in the past considering multiple interpretations and creating evidence based historical accounts In each chapter the authors explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory thus providing specific examples of successful activities and placing them in a theoretical context that allows teachers to adapt and apply them in a wide variety of settings New in the Fourth Edition Expanded coverage of world history in two new chapters Integration of new technologies to support history instruction Updated classroom examples
