The Oxford Handbook of Twentieth-century American Literature Leslie Bow,Russ Castronovo,2022 A collection of essays situating twentieth century American literature in a global frame This volume reads US literature through the a range of critical lenses including critical race and indigenous studies disability and care studies environmental criticism gender analysis and media studies

The Social Organization of Schools Maureen T. Hallinan,2013-06-29 This volume addresses key issues in the sociology of education concerning how schools are organized for instruction and what processes link school organization and instruction to educational achievement The content of the chapters represents a shift in focus from traditional and even recent themes in sociology of education including the study of school effects and of classroom processes to a concern with the social organization of schools and its consequences for student outcomes Rather than reviewing or evaluating existing research the chapters present new and developing conceptualizations of the schooling process and provide theoretical models to guide future empirical work on schools A unique feature of this book is its heavy emphasis on theory Each chapter presents a theoretical model or argument concerning an issue of central importance in sociology of education The empirical analyses and simulations that are included are often more for illustrative purposes than for rigorous hypothesis testing and some chapters have no data analysis at all The major strength of the volume therefore lies in the new conceptualizations and reconceptualizations it provides of fundamental processes relating school organization to student learning Theoretical work such as this is exactly what is needed in an area that has traditionally been for the most part empirical and atheoretical Another important feature of this volume is the various approaches it presents to the study of school organization
