, *Alternative Assessment Techniques for Reading & Writing* Wilma H. Miller, 1995-05-22 This practical resource helps elementary classroom remedial reading and LD teachers make the best possible informal assessment of a child s specific reading writing and spelling strengths and weaknesses and attitudes toward reading Written in easy to follow nontechnical language it provides a multitude of tested informal assessment strategies and devices such as kid watching retellings journals IRIs writing surveys portfolios think alouds and more including more than 200 reproducible assessment devices ready for immediate use You ll find a detailed description of each informal assessment techniques along with step by step procedures for its use and wherever possible one or more reproducible sample devices Complete answer keys for each device are included with the directions Among the unique topics covered are the innovative Individual Reading Inventory San Diego Quick Assessment List El Paso Phonics Survey QAD Chart Holistic scoring of writing and Reproducible devices for portfolio assessment In short *Alternative Assessment Techniques for Reading and Writing* offers a wealth of tested ready to use informal assessment information and devices that should save the teacher a great deal of time and energy in making a useful assessment of any student s literacy ability *On the Miss Middleton Effect* Geraldine E. Rodgers, 2022-07-20 Miss Middleton s scores are indeed a frozen moment in time which prove the existence in 1913 and 1914 of automatic phonic decoding of print as opposed to conscious psycholinguistic decoding of print The scores also prove that automatic decoding does result from the phonic sound method to teach reading since that is how Miss Middleton s children learned to read However the reading experts in 1914 and after must have misinterpreted scores like Miss Middleton s wildly fluctuating scores which obviously were the result of freely wandering attention by concluding instead that the scores had proved that the sound method had failed The truth is that such low reading comprehension scores on silent reading comprehension tests for phonic trained classes suggest the presence of healthy automatic conditioned reflexes in reading Such scores may result from the Miss Middleton Effect of voluntarily wandering attention while reading automatically Her children simply did not bother to pay attention to what they were reading automatically but could have done so if they felt like it Yet the inferior deaf mute sight word method forces children s attention to meaning or they cannot read at all They may therefore score higher on simple reading comprehension tests but far far worse on spelling and on reading correctly the actual words on the page
