Houghton Mifflin Test 47:

Curriculum-based Measurement Mark R. Shinn, 1989-03-17 Developed specifically to overcome problems with traditional standardized instruments curriculum based measurement CBM has steadily increased in educational use These brief assessment probes of reading spelling written expression and mathematics serve to quantify student performance as well as to enhance academic achievement Their widening use as a means of evaluation and ultimately of instruction has created a corresponding need to expand the applications of this methodology to diverse populations This new volume addresses that need by focusing on the broader application of CBM providing practical new measures as well as detailing their use with specific student groups *The Search for Ability* David A. Goslin, 1963-05-15 A significant and eye opening examination of the current state of the testing movement in the United States where more than 150 million standardized intelligence aptitude and achievement tests are administered annually by schools colleges business and industrial firms government agencies and the military services Despite widespread acceptance of these ability tests there is surprisingly little systematic information about their use or effect This book examines raises questions about and points the way to needed research on ability testing It considers the possible social legal and emotional impact on society the groups and organizations that make use of the tests and the individuals who are directly affected by the results **Catalog of Copyright Entries. Educational and Psychological Testing Martin Holeman, Richard Docter, 1972-03-15 Educational and psychological tests are often used in ways which touch most intimately the lives of people For example tests may influence who gets a job

or who is selected to attend a college or graduate school But not everyone has agreed that tests are a good thing Over the past twenty years a wave of complaints has led to congressional hearings court cases and formal grievances before state and federal commissions Holmen and Docter have analyzed these complaints and criticisms not only by considering the tests themselves but through examining the ways tests are used as elements in assessment systems The applications of tests in clinical and counseling work in educational achievement testing and in personnel selection is discussed and evaluated While the least amount of testing is in the personnel selections area this is where the most complaints are found Educational achievement testing has by far the largest testing programs and a wide range of criticisms has been voiced concerning this kind of assessment Testing in connection with clinical and counseling work has generated the least public concern An extensive analysis is given of the organizations which comprise the testing industry including the various developers and publishers of tests and also test scoring organizations The users of tests are considered from the standpoint of their professional training and also in terms of how their organizations influence technical standards of test development
