after the author's dramatic emigration to Switzerland in 1939 Richard Willstätter 1872-1942 recounts his childhood in a Jewish family in Karlsruhe his developing interest in chemistry and his studies under Adolf von Baeyer his mentor at the University of Munich Willstätter writes only briefly about the tragic early deaths of his beloved wife and of his young son but describes in detail his work as a leading organic chemist tackling difficult problems in plant pigments chlorophyll enzymes and more in Zurich Berlin and Munich where he succeeded his mentor and his training of dozens of young chemists In 1924 he resigned from the University of Munich in face of increasing antisemitism The book offers candid portraits of major fellow chemists including Willstätter's close friend Fritz Haber also a Nobel prize laureate and describes life in German research universities before the Nazis persecution of Jewish scholars decimated them The book goes far beyond a chronicle of events in Willstätter's life it is a valuable contribution to the history of chemistry Nature Willstätter's story is a reflection of the glory and the tragedy that is modern German history These memoirs which are truly an inside story of German chemical scholarship are filled with delightful personal reminiscences and interesting anecdotes about the great chemists Willstätter was associated with during the course of his remarkable career David H.
