An Ode to My Mother-in-Law, Winnie Serobe Gloria Tomatoe Serobe, 2023-07-21 Gloria Tomatoe Serobe ne Ndaliso married Gaur Serobe in 1987 following a six month courtship And so began Gloria's 26 year relationship with her mother in law Winnie Serobe Winnie Serobe was born in Thaba Nchu in 1933 in a deeply racialised South Africa Yet she transcended all the barriers put in place by the South African government and society at large to become a nurse midwife community builder social entrepreneur and leader In the course of her marriage to Andrew Serobe for 40 years during which they became parents to five children she was never only a wife and a mother This book is Gloria's ode of love honour and respect to her mother in law whom she referred to as Mama It brings to life the story of a Winnie Serobe who we may not read about when we look at the heroes and heroines of this country but who served those around her every day She remains memorialised in the hearts and minds of those for whom she fought for the right to be educated buried with dignity and provided with the best quality healthcare particularly for mothers and their unborn and new born babies Throughout her remarkable life Winnie Serobe saw heard and homed some of the most vulnerable stigmatised ostracised and perhaps forgotten members of her community Throughout this life well lived she nurtured and mentored Gloria as a makoti of the Serobe family She reframed marriage family and service for the young Gloria lessons which Gloria shares in the pages of this book Gloria Tomatoe Serobe is a founding member and CEO of WIPHOLD and is a leading activist for community upliftment the empowerment of women and the sustainable transformation of the South African economic landscape She has been recognised for her leadership in business and community activism with numerous awards and a number of honorary degrees

South Africa 2014 Brett Bowes, Stuart Pennington, 2004 **Ancestors and Antiretrovirals** Claire Laurier Decoteau, 2024-05-31 In the years since the end of apartheid South Africans have enjoyed a progressive constitution considerable access to social services for the poor and sick and a booming economy that has made their nation into one of the wealthiest on the continent At the same time South Africa experiences extremely unequal income distribution and its citizens suffer the highest prevalence of HIV in the world As Archbishop Desmond Tutu has noted AIDS is South Africa's new apartheid In *Ancestors and Antiretrovirals* Claire Laurier Decoteau backs up Tutu's assertion with powerful arguments about how this came to pass Decoteau traces the historical shifts in health policy after apartheid and describes their effects detailing in particular the changing relationship between biomedical and indigenous health care both at the national and the local level Decoteau tells this story from the perspective of those living with and dying from AIDS in Johannesburg's squatter camps At the same time she exposes the complex and often contradictory ways that the South African government has failed to balance the demands of neoliberal capital with the considerable health needs of its population

The Science and Applications of Microbial Genomics Institute of Medicine,Board on Global Health,Forum on Microbial Threats,2013-05-02 Over the past several decades new scientific tools and approaches for detecting microbial species have dramatically enhanced our appreciation of the diversity and abundance of the microbiota and its dynamic interactions with the environments within which these microorganisms reside The first bacterial genome was sequenced in 1995 and took more than 13 months of work to complete Today a microorganism s entire genome can be sequenced in a few days Much as our view of the cosmos was forever altered in the 17th century with the invention of the telescope these genomic technologies and the observations derived from them have fundamentally transformed our appreciation of the microbial world around us On June 12 and 13 2012 the Institute of Medicine s IOM s Forum on Microbial Threats convened a public workshop in Washington DC to discuss the scientific tools and approaches being used for detecting and characterizing microbial species and the roles of microbial genomics and metagenomics to better understand the culturable and unculturable microbial world around us Through invited presentations and discussions participants examined the use of microbial genomics to explore the diversity evolution and adaptation of microorganisms in a wide variety of environments the molecular mechanisms of disease emergence and epidemiology and the ways that genomic technologies are being applied to disease outbreak trace back and microbial surveillance Points that were emphasized by many participants included the need to develop robust standardized sampling protocols the importance of having the appropriate metadata data analysis and data management challenges and information sharing in real time The Science and Applications of Microbial Genomics summarizes this workshop

Real Governance and Practical Norms in Sub-Saharan Africa Tom De Herdt,Jean-Pierre OLIVIER de SARDAN,2015-05-15 Although international development discourse considers the state as a crucial development actor there remains a significant discrepancy between the official norms of the state and public services and the actual practices of political elites and civil servants This text interrogates the variety of ways in which state policies and legal norms have been translated into the set of practical norms which make up real governance in sub Saharan Africa It argues that the concept of practical norms is an appropriate tool for an ethnographic investigation of public bureaucracies interactions between civil servants and users and the daily functioning of the state in Africa It demonstrates that practical norms are usually different from official norms complementing bypassing and even contradicting them In addition it explores the positive and negative effects of different aspects of this real governance This text will be of key interest to academics students and researchers in the fields of development political science anthropology and development studies African studies international comparative studies implementation studies and public policy

Improving Food Safety Through a One Health Approach Institute of Medicine,Board on Global Health,Forum on Microbial Threats,2012-10-10 Globalization of the food supply has created conditions favorable for the emergence reemergence and

spread of food borne pathogens compounding the challenge of anticipating detecting and effectively responding to food borne threats to health In the United States food borne agents affect 1 out of 6 individuals and cause approximately 48 million illnesses 128 000 hospitalizations and 3 000 deaths each year This figure likely represents just the tip of the iceberg because it fails to account for the broad array of food borne illnesses or for their wide ranging repercussions for consumers government and the food industry both domestically and internationally A One Health approach to food safety may hold the promise of harnessing and integrating the expertise and resources from across the spectrum of multiple health domains including the human and veterinary medical and plant pathology communities with those of the wildlife and aquatic health and ecology communities The IOM s Forum on Microbial Threats hosted a public workshop on December 13 and 14 2011 that examined issues critical to the protection of the nation s food supply The workshop explored existing knowledge and unanswered questions on the nature and extent of food borne threats to health Participants discussed the globalization of the U S food supply and the burden of illness associated with foodborne threats to health considered the spectrum of food borne threats as well as illustrative case studies reviewed existing research policies and practices to prevent and mitigate foodborne threats and identified opportunities to reduce future threats to the nation s food supply through the use of a One Health approach to food safety Improving Food Safety Through a One Health Approach Workshop Summary covers the events of the workshop and explains the recommendations for future related workshops [Southern Africa Report](#) ,2007

HIV/AIDS in South Africa 25 Years On Poul Rohleder,Leslie Swartz,Seth C. Kalichman,Leickness Chisamu Simbayi,2009-09-01 Much has happened since the first appearance of AIDS in 1981 it has been identified studied and occasionally denied The virus has shifted host populations and spread globally Medicine the social sciences and world governments have joined forces to combat and prevent the disease And South Africa has emerged as ground zero for the pandemic The editors of HIV AIDS in South Africa 25 Years On present the South African crisis as a template for addressing the myriad issues surrounding the epidemic worldwide as the book brings together a widely scattered body of literature analyzes psychosocial and sexual aspects contributing to HIV transmission and prevention and delves into complex intersections of race gender class and politics Including largely overlooked populations and issues e g prisoners persons with disabilities stigma as well as challenges shaping future research and policy the contributors approach their topics with rare depth meticulous research carefully drawn conclusions and profound compassion Among the topics covered The relationship between HIV and poverty starting from the question Which is the determinant and which is the consequence Epidemiology of HIV among women and men concepts of femininity and masculinity and gender inequities as they affect HIV risk gender specific prevention and intervention strategies The impact of AIDS on infants and young children risk and protective factors care of children by HIV positive mothers HIV infected children Current prevention and treatment projects including local level responses community based work and VCT voluntary counseling and testing programs New directions promoting

circumcision vaccine trials positive prevention South Africa's history of AIDS denialism The urgent lessons in this book apply both globally and locally making HIV/AIDS in South Africa 25 Years On uniquely instructive and useful for professionals working in HIV/AIDS and global public health [The Social Biology of Microbial Communities](#) Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2013-01-10 Beginning with the germ theory of disease in the 19th century and extending through most of the 20th century microbes were believed to live their lives as solitary unicellular disease causing organisms This perception stemmed from the focus of most investigators on organisms that could be grown in the laboratory as cellular monocultures often dispersed in liquid and under ambient conditions of temperature lighting and humidity Most such inquiries were designed to identify microbial pathogens by satisfying Koch's postulates 3 This pathogen centric approach to the study of microorganisms produced a metaphorical war against these microbial invaders waged with antibiotic therapies while simultaneously obscuring the dynamic relationships that exist among and between host organisms and their associated microorganisms only a tiny fraction of which act as pathogens Despite their obvious importance very little is actually known about the processes and factors that influence the assembly function and stability of microbial communities Gaining this knowledge will require a seismic shift away from the study of individual microbes in isolation to inquiries into the nature of diverse and often complex microbial communities the forces that shape them and their relationships with other communities and organisms including their multicellular hosts On March 6 and 7 2012 the Institute of Medicine's IOM's Forum on Microbial Threats hosted a public workshop to explore the emerging science of the social biology of microbial communities Workshop presentations and discussions embraced a wide spectrum of topics experimental systems and theoretical perspectives representative of the current multifaceted exploration of the microbial frontier Participants discussed ecological evolutionary and genetic factors contributing to the assembly function and stability of microbial communities how microbial communities adapt and respond to environmental stimuli theoretical and experimental approaches to advance this nascent field and potential applications of knowledge gained from the study of microbial communities for the improvement of human animal plant and ecosystem health and toward a deeper understanding of microbial diversity and evolution [The Social Biology of Microbial Communities Workshop Summary](#) further explains the happenings of the workshop [ACCCN's Critical Care Nursing - E-Book](#) Leanne Aitken, Andrea Marshall, Wendy Chaboyer, 2015-10-01 With each edition ACCCN's Critical Care Nursing has built on its highly respected reputation Its contributors aim to encourage and challenge practising critical care nurses and students to develop world class critical care nursing skills in order to ensure delivery of the highest quality care Endorsed by the Australian College of Critical Care Nurses ACCCN this 3rd edition presents the expertise of foremost critical care leaders and features the most recent evidence based research and up to date advances in clinical practice technology procedures and standards Expanded to reflect the universal core elements of critical care nursing practice authors Aitken Marshall and Chaboyer have retained the specific
