South African and Migrant Entrepreneurs in Johannesburg Peberdy,

Sally,2017-04-11 Debates about international migration in South Africa often centre on the role of international migrant entrepreneurs who are seen to be more successful than their South African counterparts squeezing them out of entrepreneurial spaces particularly in townships This report explores and compares the experiences of international and South African migrant entrepreneurs operating informal sector businesses in Johannesburg **Academic Life in the Measured University** Tai Peseta,Simon Barrie,Jan McLean,2020-05-18 While a life in academia is still one bestowed with enormous privilege and opportunity on the inside its cracks and fragility have been on display for some time We see evidence of this in researchers bemoaning time spent applying for grants rather than doing research teachers frustrated at the ways student feedback data are deployed to feed judgements about them and doctoral students realising that they have little chance of securing full time academic work Yet in the public policy domain the opposite appears true academics left to their own devices in their elite ivory towers rarely ever do enough This collection addresses the fact that academic life deserves to be rigorously researched Its emphasis on the measured university traces how academic life had ceded itself to the logics of perverse measures and raises questions about whether the contemporary university may well have become too measured to adequately counter the political times now upon us The contributors explore the ways in which measurement inhabits paradoxical positions in these spaces It sketches the contours and consequences of mismeasurement including the personal costs to academic staff It examines our desires and fumbled efforts at institutional transformation and it puts on display our own ethical conduct The collection concludes with a call to chart a course for a revitalized moral economy of academic labour This book was originally published as a special issue of Higher Education Research Development **South African Economy** Vusi Gumede,Santos Bila,Mduduzi Biyase,Shonisani Chauke,Sodiq Arogundade,2024-05-15 The South African economy has largely performed below its potential Although the size of the South African economy has significantly increased since 1994 its performance has lagged behind other comparable economies and has even been overtaken by

Nigeria as the largest economy in Africa Unemployment income inequality and poverty have remained high since 1994 In the past decade South African economic performance has been so poor that it has resulted in declining per capita incomes In this study Vusi Gumede and his co authors offer a comprehensive analysis of the South African economy since 1994 dealing with many important issues ranging from its history to its political travails in an effort to provide better understanding and find possible solutions to ensuring inclusive growth
