The Politics and Practice of Occupational Health and Safety Law Enforcement Diego Canciani, 2018-10-04 This book takes a critical approach to examining British and Italian occupational health and safety enforcement policies and questions the legal and political principles that underpin them The book undertakes a comparative critical analysis of these two jurisdictions health and safety regulatory enforcement practices by focusing on the causes and consequences of the under criminalisation of these crimes It explores the fundamentals of these two jurisdictions criminal justice systems and political practices policies and traditions and exposes how these translate into pragmatic social inequality and injustice for victims of occupational health and safety crimes and more generally citizens Findings are drawn from qualitative interviews conducted with front line occupational health and safety enforcement officers This book offers an account of the challenges encountered when attempting to scrutinise public institutions responsible for policing crimes of the powerful The comparison of the political and criminal justice system practices policies and traditions of the British and Italian legal systems offer a valuable critical contribution to the anglophone literature on the subject and more generally on regulatory enforcement policies and practices

The Umbilical Cord Blood Controversies in Medical Law Karen Devine, 2017-01-12 Since the therapeutic value of umbilical cord blood UCB stem cells was first recognised in the late 1980s there has been a proliferation of both public and private UCB banks worldwide However the ability to utilise such a potentially valuable resource has provoked a number of controversies In a distinctly accessible style this book unpacks the socio legal implications of the UCB collection process and constructs a detailed analysis of the law and ethics that surrounds UCB banking in the UK including ownership of the cells Its enquiry is located within the theoretical framework of altruism versus self interest and explores the notions of risk and choice associated with this distinctive blend of public private healthcare provision The book evaluates the impact of the Human Tissue Act 2004 and the European Union Tissues and Cells Directive 2004/23/EC on the UCB industry and provides a unique insight into the effect that the law may have on the NHS whose maternity staff and premises are used to collect UCB This book would be of interest primarily to a UK readership in addition to expectant families health professionals students academics practitioners and the UCB industry elsewhere in the world

Pediatric Drug Development Andrew E. Mulberg, Steven A.

Silber, John N. van den Anker, 2011-09-20 *Pediatric Drug Development Concepts and Applications* is designed as a reference and textbook and is meant to address the science of differences between the pediatric and adult subject in the development of pharmaceutical products. Considered are the ethics and medical needs of proper understanding the pediatric and adult differences the business case for proper development of drugs for children as well as the technical feasibility studies and processes that are necessary for a proper pediatric drug development program. The applications of these approaches will benefit all stakeholders and ultimately not only educate but also provide better and safer drugs for pediatric patients.

Health and Safety in a Changing World Robert Dingwall, Shelley Frost, 2016-12-06 When health and safety regulatory frameworks took their present form in the 1970s they were seen as a triumph of welfare state intervention. Since then as heavy industry has declined and office and retail employment have expanded new ways of working have radically altered the context of health and safety policy. Many people have come to see health and safety interventions as an obstacle to innovation. This book aims to address the changing context of health and safety policy exploring concerns arising within the profession and the appropriate responses. Its manifesto for reform promises to frame the debate within the professional and policy community for a generation. The result of a major research programme funded by the Institution of Occupational Safety and Health (IOSH). *Health and Safety in a Changing World* shows how health and safety policy has developed over time how it is applied in practice and how best to make it fit for purpose in the 21st century. The book will be essential reading for professionals, practitioners and academic readers with an interest in the rapidly evolving field of health and safety.

and brought out in the form of a conference proceedings *How We Became Our Data* Colin Koopman, 2019-06-19 We are now acutely aware as if all of the sudden that data matters enormously to how we live How did information come to be so integral to what we can do How did we become people who effortlessly present our lives in social media profiles and who are meticulously recorded in state surveillance dossiers and online marketing databases What is the story behind data coming to matter so much to who we are In *How We Became Our Data* Colin Koopman excavates early moments of our rapidly accelerating data tracking technologies and their consequences for how we think of and express our selfhood today Koopman explores the emergence of mass scale record keeping systems like birth certificates and social security numbers as well as new data techniques for categorizing personality traits measuring intelligence and even racializing subjects This all culminates in what Koopman calls the informational person and the informational power we are now subject to The recent explosion of digital technologies that are turning us into a series of algorithmic data points is shown to have a deeper and more turbulent past than we commonly think Blending philosophy history political theory and media theory in conversation with thinkers like Michel Foucault Jürgen Habermas and Friedrich Kittler Koopman presents an illuminating perspective on how we have come to think of our personhood and how we can resist its erosion **SickKids** David Wright, The Hospital for Sick Kids, 2017-01-06 Toronto's Hospital for Sick Children is the most famous medical institution in Canada In addition to being the largest pediatric centre in North America it has earned an international reputation for clinical care and research that has influenced generations of health care practitioners across the country and around the world In a very real sense hospital staff have touched the lives of tens of thousands of children and their families SickKids has an equally remarkable history from its humble origins in rented houses in Victorian Toronto the Hospital would flourish to become an influential paediatric institution pioneering Pasteurization the Iron Lung for Polio Pablum the Mustard Procedure for Blue Babies and the discovery of the gene for Cystic Fibrosis It would also be the site of two of most famous medical controversies in modern Canadian history the suspected murder of two dozen babies in the early 1980s and more recently the whistle blowing controversy involving the research scientist Nancy Olivieri David Wright's *History of The Hospital for Sick Children* chronicles this remarkable history of the SickKids including its triumphs and tragedies its discoveries and dead ends In doing so Wright has crafted a compelling and accessible history of SickKids that anchors Toronto's children's hospital within the broader changes affecting Canadian society and medical practice over the last century *Reclaiming health and safety for all* Ragnar Løfstedt, Great Britain Department for Work and Pensions, 2011-11-28 The focus of this review has been on the 200 or so regulations and the 53 Approved codes of practice owned by the Health and Safety Executive It concentrates on areas where evidence and contributions have indicated that regulations are putting undue costs on business whilst doing little to improve health and safety outcomes The general sweep of requirements set out in health and safety legislation are broadly fit for purpose but there are a few that offer little benefit to health and safety and which the government should remove revise

or clarify in particular the duties for self employed people whose work activities pose no potential risk of harm to others The much bigger problem is that regulator requirements are misunderstood and applied inappropriately and recommendations are put forward to address this They seek to streamline the body of regulation re direct enforcement activity towards business where there is the greatest risk of injury or ill health re balancing the civil justice system by clarifying the status of pre action protocols and reviewing strict liability provisions Aspiration and Anxiety Christina Ho,2020-06-02 The children of Asian migrants are often perceived to be perfect students ambitious studious and compliant They are remarkably successful routinely outperforming other students in exams dominating selective school intakes and disproportionately winning places at prestigious universities While their hard work and success have been praised their achievements have ignited fierce debates about whether their migrant parents are pushing too hard or whether they ought to be lauded for their commitment to education Critics see a dark side symbolised by the tiger mother who is obsessed with producing overachieving dragon children What is often missing in these debates is an understanding of what drives Asian migrant parents approaches to education This book explores how aspirations for their children s future reinforce their anxieties about being newcomers in an unequal society **Health Policy and Advocacy in Hand Surgery, An Issue of Hand Clinics , E-Book** Kevin C. Chung,2020-05-11 This issue of Hand Clinics guest edited by series consulting editor Dr Kevin C Chung will focus on Health Policy and Advocacy in Hand Surgery This issue is one of four issues selected each year by Dr Chung Key topics discussed in this issue include but are not limited to Impact of Evidence and Health Policy on Hand Surgery Practice Navigating the Intersection of Evidence and Policy in Hand Surgery Practice Translating Hand Surgery Evidence into Practice and Policy Using Evidence for Hand Surgery How to Practice Evidence Based Hand Surgery Care Impact of the Current United States Healthcare Environment on Practice A Private Practice Viewpoint Influence of the United States Healthcare Environment and Reform on Academic Healthcare Practice Leveraging the Electronic Medical Record System to Enhance Hand Surgery Practice How to Capture Suitable Revenue Reimbursement and the Current Healthcare Environment with Considerations of Bundled Payments Evidence Based Hand Therapy and It s Impact on Health Care Policy Access to Hand Therapy Following Surgery in United States Barriers and Facilitators The Intersection of Hand Surgery Practice and Industry Establishment of a National Hand Surgery Data Registry Providing Hand Surgery Care to the Vulnerably Uninsured Patient Impact of Healthcare Reform on Innovation and Technology and Health Policy Evaluation in Hand Surgery Evaluating What Works among others **Corporatizing American Health Care** Robert W. Derlet,2021-02-02 Tracking the evolution of medical care from an individualized small cottage profession to a giant impersonal corporate industry costing Americans over 3 trillion each year Over the past three decades the once efficient American health care system has evolved into a complex maze of monopolies and a racket of bureaucratic checks approvals denials roadblocks and detours This shift has created a massive and at times redundant workforce that frustrates patients as well as physicians nurses and administrative

staff Health care costs the United States over 3 trillion each year and consumes over 18% of the country's gross domestic product That's more than 11 000 for each person in the country each year more than double what it costs in most Western European countries to deliver equal or even better care In *Corporatizing American Health Care* Robert W Derlet MD traces the progression of health care policy in the United States How he asks has US health care transformed from bedside medicine a model of small practices and patient focused care into corporate medicine which prioritizes profit and deals with both patient care and outcomes as billing codes Arguing that the US Congress is the root of the problem he describes how Congress has failed to enact legislation to prevent corporate monopolies in the health care industry Instead corrupted by large campaign donations and corporate lobbyists Congress has crafted loopholes benefiting corporations and harming people Drawing on his decades as a practicing physician caring for thousands of patients as well as his university and medical school teaching experience Derlet follows changes to both policy and practice across many sectors of health care Scrutinizing how hospitals work he also takes a hard look at high prescription drug prices unresponsive insurance companies problems with the Affordable Care Act the growing medical implant device industry and even nursing homes Finally he explains why the dominance of corporations and their lobbyists over health policy means that we now pay more for our care and our medications but have less choice both in what doctors we see and in what drugs we take Breaking down the complex ABCs of health care to reveal the unscrupulous practices of the health care industry *Corporatizing American Health Care* is perfect for both students and general readers who want to understand the changes in our system from the perspective of an actual doctor Emerging Infectious Diseases ,2009
