Forbes III,2024-01-11 About the Book *Learning Gross* presents the core concepts of how to succeed as a student or professor in an essential Gross Anatomy class Dr Forbes goes where no one else has gone to the inner workings of an excellent Human Anatomy course and describes in detail the rare experience of a semester spent exploring the human body *Learning Gross* is a valuable tool for succeeding in a Gross Anatomy class In felicitous prose it is a meditation on what it takes to present and receive an excellent Anatomy course deftly assembled and stuffed with facts and information Those concepts are presented with clarity in a comprehensive format for easy reference by the reader If you are a professor this book can transform the way you present your class If you're a student how will you approach the sheer volume of information presented in a Gross Anatomy course This book will help you retain the content of the course throughout your matriculation and into your clinical practice The book discusses learning the physical anatomy Then with an imaginative wit it presents between each two chapters a little of the metaphysical embodied in a trenchant conversation with one of the donor bodies in his laboratory Unlike other books about cadaver courses written by laypeople attending a Gross Anatomy course this book is written by an academic who has spent his life in that milieu It is a special perspective one that equips the writer to present you with practical authentic advice on what it takes to succeed Excerpt from the Book For most people what's inside the body is a great mystery Haven't you found that to be so Most people entertain vague ideas about where organs are located what they do and how they work But for those of us who study human gross anatomy it's different For those of us who have the splendid opportunity to explore the body for ourselves to actually

see for ourselves the beauty and grace inside the human body and to learn its secrets in order to better serve our patients it is a compelling once in a lifetime revelation Ours is a uniquely privileged study and that study would be impossible except for the unrequitable thoughtfulness of people we've never met who had the charity to give to us what was their most intimate home for seventy eighty ninety years We begin that study as strangers strangers to the human body and strangers to each other and we invariably finish as good friends to both I'm happy you haven't missed this rare opportunity And someday when you're really old twenty thirty forty years after you graduate when you've achieved your goals and you are a practicing healthcare professional you will have occasion to get a whiff of formaldehyde and that will cause you to remember You'll remember the Anatomy Lab the names of your lab partners and instructors and your donor body And you'll reflect on what is called the music of the Anatomy Laboratory the sound of learning the sound of discovery the sound of students teaching other students all throughout the room And you will recall that lovely aroma in the lab And here's the thing when you remember you will smile I promise you will
