Cases on Historical Thinking and Gamification in Social Studies and Humanities Education Martínez-Hita, María, Carrasco, Cosme Jesús Gómez, Miralles-Martínez, Pedro, 2022-06-30 Research on history education and historical thinking is becoming increasingly relevant internationally The need for a renewal of history education is not only justified by the epistemology of history itself but also by the demand for a methodological change in education in general making students active protagonists in the construction of their learning and based on the development of competencies Further study on the potential use of gamification within social studies and humanities education is required to understand its benefits and challenges Cases on Historical Thinking and Gamification in Social Studies and Humanities Education proposes and analyzes gamification as a pedagogical innovation that can enable the renewal of the teaching and learning process of history facilitating the active learning of historical thinking concepts while influencing students conceptions of history as a discipline and as a school subject Covering key topics such as historical thinking social sciences video games and mobile learning this reference work is ideal for historians policymakers researchers scholars academicians practitioners instructors and students

Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies Keengwe, Jared, 2022-12-28 Digital content and learning technologies are now the norm at all levels of education However there is evidence to suggest that this digital shift is on a spectrum and the spectrum impacts learners in different ways This means that some instructors who seek to integrate digital content may do so using traditional teaching methods while others use innovative practices to engage learners Those who integrate innovative digital practices align their instructional practice with theories to facilitate student centered pedagogies that support and improve the depth and scope of student learning A primary characteristic of student centered learning is facilitating collaborative learning using digital content and learning technologies to engage students as well as to enhance meaningful learning The Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies provides K 20 educators with alternative pedagogical and andragogical models that are innovative and incorporate digital content and learning technologies that promote constructive learning Further this book explores the relationship between constructivist learning

digital content and learning technologies A primary argument in this book is that constructivist teaching strategies such as collaborative learning coupled with digital content and purposeful learning technologies could benefit student learning in ways that are different from those practiced in traditional non digital learning environments Covering topics such as instructional design self efficacy and library engagement this major reference work is an essential resource for pre service teachers teacher educators faculty and administrators of K 20 education librarians researchers and academicians
