CARD #1

The human body is made up of cells, tissues, organs, and systems that work together to keep everything functioning. There are a total of eleven systems in the human body. The circulatory, respiratory, immune, skeletal, excretory, urinary, muscular, endocrine, reproductive, digestive, and nervous system.

CARD #3

The muscular system works with the skeletal system to move the bones of the body. Some muscles, like the heart, move involuntarily but other muscles work on command. Skeletal muscles help us move around. Smooth muscles control organs within our body. The cardiac muscle pumps the heart and blood through our body. Muscles make your eyes move, make the food travel down the digestive tract, and make the heart pump.
