

# Chapter 6: Humans in the Biosphere

---

## State Standards

6.2 Analyze changes in population size and bio-diversity (speciation and extinction) that result from natural causes, changes in climate, human activity, and the introduction of invasive, non-native species.

## Key Terms

Monoculture  
Renewable Resources  
Nonrenewable Resources  
Sustainable Development  
Agriculture  
Industrial Development

Desertification  
Deforestation  
Pollutant  
Biological Magnification  
Smog  
Acid Rain

Biodiversity  
Ecosystem Diversity  
Species Diversity  
Genetic Diversity  
Habitat Fragmentation  
Ecological Hot Spot

## You should be able to:

1. Describe human activities that can affect the biosphere.
2. Describe the relationship between resource use and sustainable development.
3. Describe how human activities affect soil and land resources.
4. Describe how human activities affect water resources.
5. Describe how human activities affect air resources.
6. Define biodiversity and explain its value.
7. Identify current threats to biodiversity.
8. Describe how biodiversity can be preserved.
9. Explain the concept of ecological footprint.
10. Identify the role of ecology in a sustainable future.

## You should know the difference between:

- Renewable and nonrenewable resources
- Exponential and logistic growth
- Species diversity, Habitat Diversity, Biodiversity, and Genetic Diversity
- Sustainable and Unsustainable human activities (including examples)
- Density dependent and density independent factors (including examples)

Kilner, Hardly one person in ten thousand is aware that he or she is enveloped by a haze intimately connected with the body whether asleep or awake whether hot or cold which although invisible under ordinary circumstances can be seen when conditions are favourable This mist the prototype of the nimbus or halo constantly depicted around saints has been manifest to certain individuals possessing a specially gifted sight who in consequence have received the title of Clairvoyants and until quite recently to no one else This cloud or atmosphere generally termed the AURA is the subject of this treatise in so far as it can be perceived by the employment of screens containing a peculiar chemical substance in solution It may be stated at once that the writer does not make the slightest claim to clairvoyancy nor is he an occultist and he specially desires to impress upon his readers that his researches have been entirely physical and can be repeated by any one who takes sufficient interest in the subject As long as the faculty of seeing the aura was confined to a few individuals and ordinary persons had no means of corroboration or refutation the door to imposture was open Since this has been the case up to the present time the subject has always been looked on askance but there is no more charlatanism in

the detection of the human aura by the means employed than in distinguishing microbes by the aid of the microscope The chief difference lies in the claim of some people that they are able to perceive the one through the possession of extra normal eyesight while no one has yet had the hardihood to assert that they have the power of seeing an object one thousandth of a millimetre in length without instrumental aid There cannot be the least doubt of the reality of the existence of an aura enveloping a human being and this will in a short time be an universally accepted fact now that it can be made visible to nearly every person having ordinary eyesight It indeed would be strange if the aura did not vary under different circumstances and there is good reason to believe that a study of its modifications will show that they have a diagnostic value in disease The writer asks the indulgence of his readers while he makes a few personal remarks He has endeavoured to be as far as possible impartial and accurate in recording all observations and to avoid pitfalls and faults having their origin in uncontrolled enthusiasm and imagination This in one part of the subject is very difficult as so much depends upon subjective vision It is only fair to add that his sight is his most perfect sense and consequently he may be able to distinguish by its aid a little more than the average man and may thus have perceived effects which escape the notice of other observers Some of the deductions he has made may be thought and perhaps rightly too dogmatic since they are founded upon such a small number of cases but the excuse advanced is that they have been brought forward solely with the intention of providing working hypotheses to assist in future investigations The discovery of a screen making the aura visible was by no means accidental After reading about the action of the N rays upon phosphorescent sulphide of calcium the writer was for a long time experimenting upon mechanical forces of certain bodily emanations and had come to the conclusion whether rightly or wrongly that he had detected two forces besides heat that could act upon his needles and that these forces were situated in the infra red portion of the spectrum There was a hitch in his experiments and in the early part of 1908 he thought certain dyes might help him After considering their different spectra and as far as he could ascertaining their properties he made a trial of several and fixed upon the coal tar dye Dicyanin as the most likely to be useful While waiting for this chemical a thought flashed across his mind that the substance might make some portion of the effects of the above forces visible and should this be the case he expected to see the human aura He had heard about that phenomenon but until that moment never had any intention of investigating it as he believed it to be far beyond his natural powers As soon as the dye had been obtained glass screens coated with collodion or gelatine and stained with it were made but were found entirely useless as decomposition took place almost instantaneously Several other methods were tried with varying success but the only one which gave really satisfactory results was glass cells filled with an alcoholic solution of dicyanin Even these after a time change their colour from chemical decomposition and should be kept in the dark when not in use Two of these screens are needed for ordinary work one being dark and the other light but as will be mentioned later on other screens quite different will be required for special purposes Immediately a screen was finished the writer looked at a friend through it and instantly

saw round his head and hands a faint mist greyish in colour which he concluded could be nothing else than the human aura In the course of his early experiments it was not long before he noticed that he could for a few minutes see the haze without the intervention of a screen This power only lasted a short time but was found to be renewed by looking through a dark screen at the light which it is interesting to note is the general rule A minority of persons who are not able to see the aura or only to a slight extent after gazing through the dark dicyanin screen at the light will find that they can detect it more easily and distinctly if they examine it through the light dicyanin screen Herein lies the main use of the second screen Human Resource Management Textbook Sriyani Sarkar, Dr.Sanjukta Mallick Chakraborty ,2025-03-25 Unlock the Power of Human Resource Management A Comprehensive Guide for University Students offers an in depth understanding of key HRM concepts theories and practices ideal for students seeking a solid foundation or deeper knowledge With clear concise chapters the textbook provides easy to understand explanations thought provoking questions and answer hints for exam preparation Real world case studies connect theory to practice while the content is aligned with university curricula to ensure academic success The book follows the NEP model promoting experiential learning critical thinking and interdisciplinary insights from psychology sociology and economics This comprehensive guide helps students build analytical skills develop problem solving abilities and prepare for both academic assessments and real world HRM challenges

Scholz, Claudia R. Binder, 2011-07-21 In an era where humans affect virtually all of the earth's processes questions arise about whether we have sufficient knowledge of human environment interactions How can we sustain the Earth's ecosystems to prevent collapses and what roles should practitioners and scientists play in this process These are the issues central to the concept of environmental literacy This unique book provides a comprehensive review and analysis of environmental literacy within the context of environmental science and sustainable development Approaching the topic from multiple perspectives it explores the development of human understanding of the environment and human environment interactions in the fields of biology psychology sociology economics and industrial ecology The discussion emphasises the importance of knowledge integration and transdisciplinary processes as key strategies for understanding complex human environment systems HES In addition the author defines the HES framework as a template for investigating sustainably coupled human environment systems in the 21st century **Atlas of Human Infectious Diseases** Heiman F. L. Wertheim, Peter Horby, John P. Woodall, 2012-01-04 The Atlas of Human Infectious Diseases provides a much needed practical and visual overview of the current distribution and determinants of major infectious diseases of humans The comprehensive full color maps show at a glance the areas with reported infections and outbreaks and are accompanied by a concise summary of key information on the infectious agent and its clinical and epidemiological characteristics Since infectious diseases are dynamic the maps are presented in the context of a changing world and how these changes are influencing the geographical distribution on human infections This unique atlas Contains more than 145 high quality full color maps covering all major human infectious diseases Provides key information on the illustrated infectious diseases Has been compiled and

reviewed by an editorial board of infectious disease experts from around the world The result is a concise atlas with a consistent format throughout where material essential for understanding the global spatial distribution of infectious diseases has been thoughtfully assembled by international experts Atlas of Human Infectious Diseases is an essential tool for infectious disease specialists medical microbiologists virologists travel medicine specialists and public health professionals The Atlas of Human Infectious Diseases is accompanied by a FREE enhanced Wiley Desktop Edition an interactive digital version of the book with downloadable images and text highlighting and note taking facilities book marking cross referencing in text searching and linking to references and glossary terms
