Research Day 2015 MERD 15 Melaka Malaysia on 31 March 2015 **Connected Vehicles** Radovan Miucic,2018-10-24 This
book introduces concepts and technologies of Intelligent Transportation Systems ITS It describes state of the art safety
communication protocol called Dedicated Short Range Communication DSRC currently being considered for adoption by the
USDOT and automotive industry in the US However the principles of this book are applicable even if the underlying physical
layer protocol of V2X changes in the future e g V2X changes from DSRC to cellular based connectivity Fundamental ITS
concepts include topics like global positioning system Vehicle to Vehicle V2V Vehicle to Pedestrian V2P and Vehicle to
Infrastructure V2I communications human machine interface and security and privacy Fundamental concepts are sometimes
followed by the real life test experimental results such as in V2P Chapter and description of the performance metrics used to
evaluate the results This book also describes equations and math used in the development of the individual parts of the
system This book surveys current and previous publications for trending research in the ITS domain It also covers state of
the art standards that are in place for the DSRC in the US starting from the application layer defined in SAE J2735 all the
way to physical layer defined in IEEE 802.11 The authors provide a detailed discussion on what is needed to extend the

current standards to accommodate future needs of the vehicle communications such as needs for future autonomous vehicles Programs and code examples accompany appropriate chapters for example after describing remote vehicle target classification function a pseudo code and description is provided In addition the book discusses current topics of the technology such as spectrum sharing simulation security and privacy The intended audience for this book includes engineering graduate students automotive professionals engineers researchers and technology enthusiasts
