Malaysia's Motorcycle Sector: Past and Present Possibilities in an Era of Energy Transition Sara Loo, 2024-11-22 Malaysia has traditionally adopted an intensive automotive industrialization model and created its own vehicles under national brands The national car project started with Proton in 1983 and the national motorcycle project with Modenas in 1995 While policies and scholarship have focused on national car projects the two wheeler sector has stood in their shadow Modenas witnessed early growth and remains a popular brand after Yamaha and Honda it has however failed to hit export targets owing to limited technology transfer and the inability to scale In recent years there has been renewed interest in the two wheeler sector focusing on phasing out combustion motorcycles in favour of electric two wheelers E2Ws Still nascent Malaysia's electric two wheeler E2W sector appears to prioritize an extensive model of assembly and distribution rather than the protection of home grown brands Still in its infancy E2W adoption rates remain low at under 1 per cent albeit there has been high year over year growth since 2022 Interviews with E2W manufacturers regulators dealers and consumers reveal challenges beyond common
