**Houghton Mifflin Math Central: Student text** ,1998      **McDougal Littell Passport to Algebra and Geometry** Ron Larson,1999      *The Mathematics Experience* Mary Ann Haubner,1992      *Gaither's Dictionary of Scientific Quotations* Carl C. Gaither,Alma E. Cavazos-Gaither,2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics      **Explorations in Topology** David Gay,2007-08-07 Explorations in Topology gives students a rich experience with low dimensional topology enhances their geometrical and topological intuition empowers them with new approaches to solving problems and provides them with experiences that would help them make sense of a future more formal topology course The innovative story line style of the text models the problems solving process presents the development of concepts in a natural way and through its informality seduces the reader into engagement with the material The end of chapter Investigations give the reader opportunities to work on a variety of open ended non routine problems and through a modified Moore method to make conjectures from which theorems emerge The students themselves emerge from these experiences owning concepts and results The end of chapter Notes provide historical background to the chapter s ideas introduce standard terminology and make connections with mainstream mathematics The final chapter of projects provides opportunities for continued involvement in research beyond the topics of the book Students begin to solve substantial problems right from the start Ideas unfold through the context of a storyline and students become actively involved The text models the problem solving process presents the development of concepts in a natural way and helps the reader engage with the material      ,      *Focus on Probability Theory* Louis R.
