Best Books for Children, Preschool Through Grade 6, 2006 **Cougar** Maurice Hornocker, Sharon Negri, 2009-12-15 The cougar is one of the most beautiful enigmatic and majestic animals in the Americas Eliciting reverence for its grace and independent nature it also triggers fear when it comes into contact with people pets and livestock or competes for hunters game Mystery myth and misunderstanding surround this remarkable creature The cougar's range once extended from northern Canada to the tip of South America and from the Pacific to the Atlantic making it the most widespread animal in the western hemisphere But overhunting and loss of habitat vastly reduced cougar numbers by the early twentieth century across much of its historical range and today the cougar faces numerous threats as burgeoning human development encroaches on its remaining habitat When Maurice Hornocker began the first long term study of cougars in the Idaho wilderness in 1964 little was known about this large cat Its secretive nature and rarity in the landscape made it difficult to study But his groundbreaking research yielded major insights and was the prelude to further research on this controversial species The capstone to Hornocker's long career studying big cats Cougar is a powerful and practical resource for scientists conservationists and anyone with an interest in large carnivores He and conservationist Sharon Negri bring together the diverse perspectives of twenty two distinguished scientists to provide the fullest account of the cougar's ecology behavior and genetics its role as a top predator and its conservation needs This compilation of recent findings stunning photographs and firsthand accounts of field research

unravels the mysteries of this magnificent animal and emphasizes its importance in healthy ecosystem processes and in our lives Reading Ron Larson,2000 **Rethinking Suburbs** Khaled Alawadi,2024-04-11 Rethinking suburbs provides answers to how can we design and plan neighborhoods in which non motorized mobility is a viable and efficient alternative and how the street systems and alleys of neighborhoods can be designed and retrofitted to make their urban fabrics more efficient and integrated Streets play significant roles in meeting multiple sustainability objectives This research addresses Abu Dhabi s and Dubai s street connectivity at the neighborhood local and city global scales It focuses on two parameters of street network analysis efficiency and centrality Efficiency is evaluated in terms of directness noting that network designs that provide short and direct access between origins and destinations are more efficient Centrality is evaluated using graph theory metrics that enable the identification of high and low accessibility locations within networks The conventional suburban model of low density automobile centric development with fragmented streets cannot foster high levels of accessibility within neighborhoods This study offers an alternative evidence based suburban design model for future cities
