Poetry and Pedagogy across the Lifespan Sandra Lee Kleppe, Angela

Sorby, 2018-10-08 This book explores poetry and pedagogy in practice across the lifespan. Poetry is directly linked to improved literacy, creativity, personal development, emotional intelligence, complex analytical thinking and social interaction – all skills that are crucial in contemporary educational systems. However, a narrow focus on STEM subjects at the expense of the humanities has led educators to deprioritize poetry and to overlook its interdisciplinary, multi-modal potential. The editors and contributors argue that poetry is not a luxury but a way to stimulate linguistic experiences that are formally rich and cognitively challenging. To learn through poetry is not just to access information differently but also to forge new and different connections that can serve as reflective tools for lifelong learning. This interdisciplinary book will be of value to teachers and students of poetry as well as scholars interested in literacy across the disciplines. **Reading Marx in the**

Through a range of international, current day examples, Fuchs emphasises the continued importance of Marx and his work in a time when transnational media companies like Amazon, Google and Facebook play an increasingly important role in global capitalism. Discussion questions and exercises at the end of each chapter help readers to further apply Marx's work to a modern day context. **Australian Books in Print 1997** Bowker, 1997-03 excellent
