## Genetic Trait Survey

# What Traits did I Inherit?

Teacher Notes

**Activity Summary:** Students are given a survey sheet to fill out about their physical traits that they inherit. The survey can be done before and the students can fill out their own traits right as well. Heritability is passed on by parents. Each survey is related to students' own life. There is also a class trait sheet to fill out using the individual class members. The example class is given and used to construct a bar graph.

Trait	Percentage of Students/Classmates
Language ability	English speaking - 100% Spanish speaking - 0%
Height or Last Name	Height greater than 5'6" - 10% Last Name starting with "J" - 10%
Hair/Complexion	Hair Brown/Complexion - 100% Hair Black/Complexion - 0%
Living parent(s)	One parent - 100% Two parents - 0%
Gender and siblings	Male - 50% Female - 50%

Students are grouped in their classrooms and can be separated by the individual survey.

## Next Generation Science Standards

LS.2.4-1 Analyze and interpret data to provide evidence that plants and animals have inherited traits from parents and that variations of those traits exist in a group of similar organisms.

**Flooded About Your Drain**

Time DPA is what makes you unique? Did you know that over 80% of human DNA is the same? In the matter what individual you possess at any place in the world, their DNA is almost the same as yours. That's why human beings in the world always look like human beings. They may be taller, shorter or have a different skin color than yours. But their DNA is nearly identical to yours!

The only difference in your DNA would be less than 1%, but that small difference is enough to make you unique! Your hair color, eye color, body type, and every other physical trait you have is determined by your DNA in your chromosomes.

EPNs in the subulane that chloromethanes are made out of. All human cells have 23 pairs of chromosomes that are made of DNA. A chromosome is very long piece of DNA that contains an assortment of genetic information about you. Usually that information is found in genes, which are short segments of DNA that determine a specific trait.

Thanks to FPA, all members and guests are being notified.
