**A Research of Shiva: The Enigma** Ancient Philosophy, 2019-03-20

Based on the various translations I have done of the sthotrams mantras Tantras Upanishads etc I find our understanding of Shiva is quite different from what is described in these literatures. The notion of Shiva as a God its religious association with divinity as a belief or any emotions associated with it seems alien when these texts are translated and read I find by associating emotions judgement and conclusions based on judgement to the concept of Shiva we have lost the knowledge of Shiva and romanticised it according to our needs. This book is based on my research and translations of these literatures the conclusions that I have drawn based on my translations as to what Shiva possibly could have meant. You can read the translations at my blog <https://ancientinsightonline.com>. At a very high level a contextual translation of the ancient literatures indicate that Shiva is the environment that gets created due to the vibration OM yielding to the turbulence Rudra that is present in the Isha a set of potentials. A constriction in the entanglement created due to the turbulence creates a Linga and causes a part of the vibration OM to hang perpendicular to this system. These vibrations circle over themselves and come back and meet the entanglement creating an environment of directed and reflected vibrations which then supports the formation of impulses which then grows to become awareness and beings. This environment is sustained by the Linga and the turbulence each ensuring that the other does not fade away. The book follows through from the Bhagavad Gita's Kshetra Kshetragyana Yoga Chapter 13 that describes the environment the nature of the become and the soul of the becoming to the Kalabhairava Ashtakam that describes the dimensions of the awareness to the Shiva Tandava sthotram that describes the creation of this environment to show why Shiva actually is a concept and is the environment that is formed.
