Envy of the Gods John Prevas, 2005-11-29 By the time Alexander the Great was twenty six he had conquered the world's mightiest empire Persia He was the envy of every man But Alexander had a higher aspiration to be the envy of the gods And so Alexander embarked on a long campaign of conquest across Asia He marched his army through the mountains of Afghanistan to the Indian subcontinent But as he pushed forward in his wild pursuit of glory and immortality he grew increasingly unpredictable sporadically violent and megalomaniacal In the end only seven years after he had conquered Persia Alexander the Great was defeated not by any external enemy but by himself unable to control his passions Writer and intrepid explorer John Prevas informs his absorbing Raleigh News Observer narrative through a personal retracing of much of Alexander's route through what is now Iran Afghanistan and Pakistan The author's research and travels bring brilliantly to life this riveting story of Alexander's decline and fall in the land where he sought his greatest glory **Envy of the Gods in**

The Social Sciences and Biblical Translation Dietmar Neufeld, 2008 The Bible is an ancient book written in a language other than English describing social and cultural situations incongruent with modern sensibilities To help readers bridge these gaps this work examines the translation and interpretation of a set of biblical texts from the perspectives of cultural anthropology and the social sciences The introduction deals with methodological issues enabling readers to recognize the differences in translation when words sentences and ideas are part of ancient social and cultural systems that shape meaning The following essays demonstrate how Bible translations can be culturally sensitive take into account the challenge of social distance and avoid the dangers of ethnocentric and theological myopia As a whole this work shows the importance of making use of the insights of cultural anthropology in an age of ever increasing manipulation of the biblical text From publisher's description

History as Past Ethics: An Introduction to the History of Morals Philip Van Ness Myers, 2020-09-28 Professor Freeman defined history as past politics Mr Buckle argued that the essence of the historical evolution consists in intellectual progress Many present day economists hold that the dominant forces in the historical development are economic Churchmen consistently make the chief factor in history to be religion Whether the upholders of these several interpretations of history would have us understand them as speaking of the ultimate goal of the historic evolution or merely of the dominant

motive under which men and society act none of these interpretations can be accepted by the student of the facts of the moral life of the race as a true reading of history To him not only does moral progress constitute the very essence of the historic movement but the ethical motive presents itself as the most constant and regulative force in the evolution of humanity His chief interest in all the other factors of the historical evolution is in noting in what way and in what measure they have contributed to the growth and enrichment of the moral life of mankind Thus the historian of morals is deeply interested in the growth of political institutions among men but chiefly in observing in what way these institutions have affected for good or for evil the moral life of the nation Particularly is the progress of the world toward political unity a matter of profound concern to him not because he regards the establishment of the world state as an end in itself but because the universal state alone can furnish those conditions under which the moral life of humanity can most freely expatiate and find its noblest and truest expression It is the same with intellectual progress The student of morals recognizes the fact that the progress of the race in morality is normally dependent upon its progress in knowledge that conscience waits upon the intellect But in opposition to Buckle and those of his school he maintains that so far from an advance in knowledge constituting the essence of a progressive civilization this mental advance constitutes merely the condition precedent of real civilization the distinctive characteristic of which must be a true morality A civilization or culture which does not include this is doomed to quick retrogression and decay As Benjamin Kidd truly observes When the intellectual development of any section of the race for the time being outruns the ethical development natural selection has apparently weeded it out like any other unsuitable product As with the political and intellectual elements of civilization so is it with the economic The outward forms of the moral life are it is true largely determined by the industry of a people but the informing spirit of morality is the expression of an implanted faculty It is elicited but not created by environment No industrial order from which it is lacking can long endure Natural selection condemns it as unfit And this we are beginning to recognize that economics and ethics cannot be divorced that every great industrial problem is at bottom a moral problem To the student of the ethical phase of history all social reformers from the old Hebrew prophets down to Karl Marx and Henry George are primarily moralists pleading for social justice equity and righteousness
