Radical by Nature James T. Costa, 2023-03-21 Alfred Russel Wallace 1823-1913 was perhaps the most famous naturalist in the world by the end of his life explorer extraordinaire co-discoverer with Darwin of the principle of natural selection collector of thousands of species new to science and best-selling author Wallace had fallen into obscurity in the 20th century largely eclipsed by Darwin but the 2013 centennial of his death led to renewed interest and Wallace is likely to garner attention again in 2023 with the bicentennial of his birth Against this backdrop James Costa is proposing a new biography of Wallace The chapters are arranged chronologically treating the arc of Wallace's life in a narrative that interweaves key events with the development of Wallace's thought He devotes extra space to the 8-year Malay Archipelago odyssey as the adventure that Wallace himself declared the central and controlling incident of his life and became foundational to modern evolution and biogeography Costa of course discusses Wallace's famous correspondence with Darwin and how Wallace graciously applauded Darwin's achievement and became one of his closest friends and defenders In later years Wallace became associated with the spiritualist movement and taking up a range of social causes including championing better working conditions land preservation reform in public education and legal rights for women Ultimately Costa argues that the key to understanding Wallace is to realize that he was singularly open to novel even radical ideas in scientific and social realms
