L'architecture de Montréal François Rémillard, Brian Merrett, 2007 **Le combat du patrimoine** Martin Drouin, 2005-04-03T20:00:00-04:00 Visiteurs et résidents s'accordent aujourd'hui pour affirmer que Montréal est une ville où il fait bon vivre et que cela tient entre autres son caractère patrimonial Si plusieurs se souviennent tous ne savent cependant pas qu'il a fallu plus de trente ans de luttes urbaines pour fonder cette image par laquelle la métropole est aujourd'hui

Montréal, la ville aux cent clochers Jean-François Leclerc, Colette Godin, 2002 L'originalité de cet ouvrage est de mettre en valeur le patrimoine architectural religieux grâce aux photographies de quarante Montréalais amateurs de talent Il a aussi fait appel des spécialistes et autres moins des diverses traditions religieuses pour traiter des différents aspects concernant les lieux de culte histoire architecture vie communautaire et futur SDM **Montréal en évolution** Jean-Claude Marsan, 1974 *Translating Montreal* Sherry Simon, 2006-10-10 The divided Montreal of the 1960s is very different from today's cosmopolitan hybrid city Taking the perspective of a walker moving through a fluid landscape of neighbourhoods and eras Sherry Simon experiences Montreal as a voyage across languages Sketching out literary passages from the then of the colonial city to the now of the cosmopolitan Montreal she traces a history of crossings and intersections around the familiar sites and symbols of the city the mythical boulevard Saint Laurent Mile End the Jacques Cartier Bridge Mont Royal

Montreal in Evolution Jean-Claude Marsan, 1990 Montreal in Evolution presents the rich and complex history of Montreal's architectural and environmental development from the first fort of Ville Marie to the skyscrapers of today It also examines the forces which shaped the city during the past three hundred and fifty years *Architecture and Town Planning in Colonial North America* James D. Kornwolf, Georgiana Wallis Kornwolf, 2002 Incorporating more than 3 000 illustrations Kornwolf's work conveys the full range of the colonial encounter with the continent's geography from the high forms of architecture through formal landscape design and town planning From these pages emerge the fine arts of environmental design an understanding of the political and economic events that helped to determine settlement in North America an appreciation of the various architectural and landscape forms that the settlers created and an awareness of the diversity of the continent's geography and its peoples Considering the humblest buildings along with the mansions of the wealthy and powerful public buildings forts and churches Kornwolf captures the true dynamism and diversity of colonial communities

their rivalries and frictions their outlooks and attitudes as they extended their hold on the land **Place Ville Marie** France Vanlaethem,2012 This book traces the fascinating history of what Montrealers still call the city's grande dame From the complex's earliest beginnings with developer William Zeckendorf through its later transformations the reader will discover in these pages a broad swath of our architectural heritage replete with lavish illustrations Authored by a team of seasoned writers to coincide with the celebrations surrounding the 50th anniversary of the complex this book is intended for both architecture enthusiasts the people who shaped this showplace of corporate life and anyone who is simply curious to know more about the circumstances surrounding the creation of this skyscraper that has been is still today and will continue to be the pride of Montrealers **Church of Notre Dame in Montreal** Franklin Toker,1991 In the extensive new preface Toker examines the approach he took in writing *The Church of Notre Dame in Montreal* and reflects on the implications of what has been discovered since the book was first published in 1970 Origins, Imitation, Conventions James S. Ackerman,2024-03-19 Twelve studies by eminent art historian James S Ackerman This collection contains studies written by art historian James Ackerman over the past decade Whereas Ackerman's earlier work assumed a development of the arts as they responded to social economic political and cultural change his recent work reflects the poststructural critique of the presumption of progress that characterized Renaissance and modernist history and criticism In this book he explores the tension between the authority of the past which may act not only as a restraint but as a challenge and stimulus and the potentially liberating gift of invention He examines the ways in which artists and writers on art have related to ancestors and to established modes of representation as well as to contemporary experiences The origins studied here include the earliest art history and criticism the beginnings of architectural drawing in the Middle Ages and Renaissance Leonardo Da Vinci's sketches for churches the first in the Renaissance to propose supporting domes on sculpted walls and piers and the first architectural photographs Imitation refers to artistic achievements that in part depended on the imitation of forms established in practices outside the fine arts such as ancient Roman rhetoric and print media Conventions like language facilitate communication between the artist and viewer but are both more universal understood across cultures and more fixed resisting variation that might diminish their clarity The three categories are closely linked throughout the book as most acts of representation partake to some degree of all three **La vie culturelle à Montréal vers 1900** Micheline Cambron,Bibliothèque nationale du Québec,2005 *Carpentier's Proustian Fiction* Sally Harvey,1994 Critical study of Cuban novelist and Proust's influence on selected works *Canadian Reference Sources* Mary E. 1890-1990 Luc Noppen, Hélène Jobidon, Paul Trépanier, 1990 A l'aide de photos et de plans un bilan centenaire de l'architecture dans la ville et la région de Québec Quelques projets la fin présentent les brèves biographies des intervenants et la bibliographie des monuments **Montreal, City of Spires** Clarence Epstein, 2012-03-19T00:00:00-04:00 Of the fifty religious buildings discussed in this book only a precious few remain standing despite the fact that Montreal boasts one of the largest and most eclectic groupings of Georgian and Victorian structures of any city in North America Following the British conquest of New France in 1759 a remarkable series of transformations took place in the small Catholic trading town of Montreal Given the diversity of settlers forced to live side by side the new church buildings that were to rise became strategic public spaces meeting places as well as power bases It was no wonder that by the time Mark Twain toured Canada's first metropolis in the 1880s he found that one could not throw a brick in the place without breaking a church window By addressing the social religious and architectural issues surrounding these colonial era structures it will become apparent that Montreal was at once a shining jewel in England's imperial crown a chief outpost of Catholicism in the New World as well as the British North American headquarters for more than a dozen independent congregations *French Encounters with the American Counterculture 1960-1980* Caroline Maniaque-Benton, 2016-12-05 French American interrelationships in the areas of design and creative thinking have been under acknowledged It is normally asserted that French architects looked to North America for technical lessons in the development of modern architecture in the 1960s but that the French cultural environment was generally hostile to American ideas This book includes interviews with French architects who visited the United States in the 1960s 1970s and then assumed influential positions in the press and education in France Some of these architects found in non mainstream America and its radical groups of architectural drop outs a liberating force free of the taint of American capitalism and the high investment technology Often living in alternative student communities they saw highly innovative low cost technical and structural systems placed in the service of collective forms of living which represented a critique not only of professional architectural practice but also of bourgeois forms of living Many of them also studied in American schools of architecture and came in contact with an intellectual and interdisciplinary style of architectural education unavailable in France at that time **Montreal Architecture** François Rémillard, Brian

Merrett,1990 *Intelligent Tutoring Systems* Claude Frasson,Gilles Gauthier,1992-05-27 This volume of the Encyclopaedia offers a systematic introduction and a comprehensive survey of the theory of complex spaces It covers topics like semi normal complex spaces cohomology the Levi problem q convexity and q concavity It is the first survey of this kind The authors are internationally known outstanding experts who developed substantial parts of the field The book contains seven chapters and an introduction written by Remmert describing the history of the subject The book will be very useful to graduate students and researchers in complex analysis algebraic geometry and differential geometry Another group of readers will consist of mathematical physicists who apply results from these fields
