**Must Inclusion be Special** examines the discord between special and inclusive education and why this discord can only be resolved when wider inequalities within mainstream education are confronted It calls for a shift in our approach to provision from seeing it as a conglomeration of individualised needs to identifying it as a conglomeration of collective needs The author examines the political medical and cultural tendency of current times to focus upon the individual and contrasts this with the necessity to focus on context This book distinguishes the theoretical perspectives that are often associated with special or inclusive education and the broad range of interests which depend upon their ongoing development This examination leads to a problematisation of mainstream education provision our understanding of why social inequities emerge and how additional support can overcome these inequities Further chapters explore the underlying challenges which emerge from our use and understanding of the notions of special and inclusive outlining an alternative approach based upon a community of provision This approach recognises the interconnectedness of services and the significance of context and it encapsulates the aspiration of much international legislation for participation and inclusion for all But it also assumes that we tend towards diffuse practices services policies settings and roles spread across provision which is variously inclusive and exclusionary In

seeking to create equitable participation for all support needs to shift its focus from the individual to this diffuse network of contexts Must Inclusion be Special emerges from the research base which problematises inclusion and special education drawing upon examples from many countries It also refers to the author s research into pedagogy language and policy and his experiences as a teacher and the parent of a child identified with special educational needs **Psychological Studies**

**Education and Development** Simon McGrath, Qing Gu, 2015-07-24 This timely Handbook takes stock of the range of debates that characterise the field of international education and development and suggests key aspects of a research agenda for the next period. It is deliberately divergent in its approach, recognising the major ideological and epistemological divides that characterise a field that draws on many traditions. Leading and emergent voices from different paradigms and contexts are afforded a space to be heard, and each section puts current debates in larger historical contexts. The Handbook is divided in four parts and book ended by an introduction and a conclusion, the latter oriented towards the implications that the volume has for future research agendas. The first part explores major strands of debates about education's place in development theory. The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching and schools play in development. Part three looks beyond schools to consider early years, adult and vocational education but focuses particularly on the return to thinking about higher education's role in development. The final part considers the changing but still important role that international cooperation plays in shaping education in developing countries. Featuring over thirty chapters written by leading international and interdisciplinary scholars, the Routledge Handbook of International Education and Development offers the first comprehensive and forward-looking resource for students and scholars.
