Islamic Financial Markets and Institutions Farhad Taghizadeh-Hesary,Hassanudin Mohd Thas Thaker,M. Ishaq Bhatti,Anwar Allah Pitchay,2025-09-28

Islamic finance has experienced significant growth particularly in the Middle East driven by financial innovation and the expansion of asset securitization. This progress is crucial for the future development of Islamic financial institutions (IFIs) but it also requires a strong regulatory framework and effective monetary policies to ensure stability and inclusivity. Maintaining compliance with Islamic law while addressing modern financial challenges presents unique complexities from risk sharing mechanisms to the integration of digital banking. This book examines the evolving landscape of Islamic finance exploring the challenges that IFIs face including limited financial inclusion, the dominance of non-Muslim ownership and gaps in regulatory oversight. It emphasizes the importance of transparency, standardized regulations and incorporating Shariah compliance into financial supervision. Through empirical research and case studies from various markets including Iran, Malaysia and Indonesia, the book highlights the risks and opportunities within Islamic financial markets. Key topics include financial inclusion, regulatory reforms, the resilience of Islamic finance during economic crises and the role of fintech in expanding access to Islamic financial services. The book also discusses innovative financial instruments such as Islamic crowdfunding, green sukuk and Takaful, highlighting their potential to promote sustainable development. It argues that while Islamic finance offers ethical and stable alternatives to conventional banking, stronger governance, technological integration and policy reforms are necessary to ensure its long-term viability. Bringing together insights from leading researchers and practitioners, this book provides a comprehensive analysis of the current state and prospects of Islamic finance. It is an essential resource for policymakers, financial regulators and industry professionals looking to enhance financial stability and inclusivity within the Islamic financial system.

Advances in Marine and Freshwater Monitoring to support Aquatic Ecosystem Conservation and Restoration Elisabetta Manea, Caterina Bergami, Robert Ptacnik, 2023-11-13. Conserving and restoring freshwater and marine ecosystems are priorities addressed by several European and global conservation initiatives. Many management and conservation initiatives have been put in place to support the achievement of declared national and global conservation and sustainability goals. Nonetheless, the extent to which all these initiatives can provide lasting positive effects on conservation and restoration targets is often impaired, limited by the lack of robust baseline data and systematic monitoring, which in turn are constrained by the limited number of long-term monitoring programs and limited dedicated funding. This collection underlines the importance of monitoring in times of global change and shifting baselines and the urgency of boosting conservation strategies to ensure progression towards meeting global conservation objectives. Emphasis is given also to the socio-ecological contexts and dimensions of conservation efforts and the potential of societal engagement in monitoring practices, a key enabling factor to turn conservation initiatives into practical actions and ecosystem protection.
