Atlas of Sedimentary Rocks Under the Microscope A.E. Adams,W.S. Mackenzie,C. Guilford,2017-09-19 Provides a very clear guide to sedimentary rock types as seen under the microscope supported by practical aspects of slide preparation

Atlas of Sedimentary Rocks Under the Microscope ,1984 **Carbonate Sediments and Rocks Under the Microscope** Anthony Adams,W.S. MacKenzie,1998-04-01 This full color atlas illustrates a range of features not attempted in any general textbook and is designed as a laboratory manual to keep beside the microscope as an aid to identifying grain types and textures in carbonates **Geomaterials Under the Microscope** Jeremy Ingham,2010-12-15 The first comprehensive guide to the petrography of geomaterials making the petrographers specialist knowledge available to practitioners educators and students worldwide interested in modern and historic construction materials **Petrology of Sedimentary Rocks** Sam Boggs,2009-02-19 Advanced textbook outlining the physical chemical and biological properties of sedimentary rocks through petrographic microscopy geochemical techniques and field study *Sedimentary Rocks in the Field* Dorrik A.V. Stow,2005-03-30 Ideas and concepts in sedimentology are changing rapidly but field work and data collection remain the basis of the science This book is intended as a guide to the recognition and description of sedimentary rocks in the field It aims to help students and professional geologists know what to observe and record and how best to interpret this data The emphasis is on illustrating the principal types of sedimentary rocks which is accomplished through more than 450 color photos and explanatory drawings The introductory chapter defines the main types of sedimentary rocks their classification and their economic significance The author then goes on to describe standard field techniques and provides a comprehensive summary of the principal characteristics of sedimentary rocks Additional chapters cover each of the main rock types and describe how to interpret rocks and their features in terms of depositional environments This book is an ideal field companion for undergraduate and graduate students of geology environmental sciences hydrogeology oceanography and more Professionals in petroleum geology and resource management as well as budding geologists will also find this to be an indispensable reference **BOOK JACKET Sedimentary Rocks and Aquifers - New Insights** Abhay Soni,Dr. Prabhat Jain,Sung-Hyo Yun,Angelo Paone,2023-11-08 Sedimentary rocks are created by the deposition or accumulation of material organic particles or minerals in bodies of water and formed at the Earth s surface Sedimentation is the name given to the formation of these rocks Limestone dolostone clay sandstone sandstone and shale are some common sedimentary rocks formed out of the sedimentation and cementation processes that cause these particles which can be coarse medium or fine grained or stratified according to their conditions of formation The first section of this book discusses different aspects of sedimentary rocks Aquifers are vital resources of freshwater in many countries However such groundwater resources are limited scarce and unevenly distributed over the Earth s surface The second section of this book discusses the basaltic aquifer and aquifers in South Africa **A Practical Guide to Rock Microstructure** Ron H.

Vernon,2004-10-07 Rock microstructures provide clues for the interpretation of rock history A good understanding of the physical or structural relationships of minerals and rocks is essential for making the most of more detailed chemical and isotopic analyses of minerals Ron Vernon discusses the basic processes responsible for the wide variety of microstructures in igneous sedimentary metamorphic and deformed rocks using high quality colour illustrations He discusses potential complications of interpretation emphasizing pitfalls and focussing on the latest techniques and approaches Opaque minerals sulphides and oxides are referred to where appropriate The comprehensive list of relevant references will be useful for advanced students wishing to delve more deeply into problems of rock microstructure Senior undergraduate and graduate students of mineralogy petrology and structural geology will find this book essential reading and it will also be of interest to students of materials science Pigment Compendium Nicholas Eastaugh,Valentine Walsh,Tracey Chaplin,Ruth Siddall,2008-09-10 This is an essential purchase for all painting conservators and conservation scientists dealing with paintings and painted objects It provides the first definitive manual dedicated to optical microscopy of historical pigments Illustrated throughout with full colour images reproduced to the highest possible quality this book is based on years of painstaking research into the visual and optical properties of pigments Now combined with the Pigment Dictionary the most thorough reference to pigment names and synonyms available the Pigment Compendium is a major addition to the study and understanding of historic pigments Customs Laboratory Bulletin ,1991 **Excavations at Tall Jawa, Jordan** Michèle Daviau,2019-09-16 In Excavations at Tall Jawa Jordan Volume 3 The Iron Age Pottery Mich le Daviau presents a detailed typology of the Iron Age pottery excavated from 1989 to 1995 She looks beyond the formal changes to an in depth analysis of the forming techniques employed to make each type of vessel from bowls to colanders cooking pots to pithoi The changes in fabric composition from Iron I to Iron II were more significant than those from Iron IIB to IIC although changes in surface treatment especially slip color were noticeable Petrographic analysis of Iron I pottery by Stanley Klassen contributes to our growing corpus of fabric types while Peter Epler documents typical Ammonite painted patterns and Elaine Kirby and Marianne Kraft present a typology of potters marks *Sedimentary Processes, Environments and Basins* Gary Nichols,Edward Williams,Chris Paola,2009-03-05 For several decades Peter Friend has been one of the leading figures in sedimentary geology and throughout that time he has helped scores of other people by supervising doctoral students collaborating with colleagues especially in developing countries and selflessly sharing ideas with fellow geologists This collection of papers is a survey of the research frontier in basin dynamics a field Peter Friend helped initiate and a token of thanks from people who have benefited from an association with Peter during their careers The papers in this book fall into four themes Tectonics and sedimentation Landscape evolution and provenance Depositional systems and Fluvial sedimentation which reflect Peter s research interests and are all important areas of current research in sedimentary geology There are both case studies and review articles on these themes which reflect recent work but the collection can also be

considered to be a sampler of sedimentary geology for anyone with broad interests in the Earth sciences

Himalayan Bronzes Chandra L. Reedy, 1997-10 Himalayan Bronzes focuses on a complete study of 340 medieval period copper alloy sculptures from the Himalayan regions of Afghanistan northern Pakistan Kashmir Himachal Pradesh Nepal and Tibet For more than 1 500 years artists in isolated valleys in and adjacent to the mountains of the Himalayas have created magnificent copper based statues representing deities and spiritual leaders of the Hindu Buddhist and Bon Po religions Author Chandra L. Preservation of Cultural Heritage and Resources Threatened by Climate Change Chiara Bertolin, 2019-08-13 With its wide spectrum of data case studies monitoring and experimental and numerical simulation techniques the multidisciplinary approach of material environmental and computer science applied to the conservation of cultural heritage offers several opportunities for the heritage science and conservation community to map and monitor state of the art knowledge on natural and human induced climate change impacts on cultural heritage mainly constituted by the built environment in Europe and Latin America Geosciences Special Issue titled Preservation of Cultural Heritage and Resources Threatened by Climate Change was launched to take stock of the existing but still fragmentary knowledge on this challenge and to enable the community to respond to the implementation of the Paris agreement These 10 papers exploit a broad range of data derived from preventive conservation monitoring conducted indoors in museums churches historical buildings or outdoors in archeological sites and city centers Case studies presented in the papers focus on a well assorted sample of decay phenomena occurring on heritage materials e.g. surface recession and biomass accumulation on limestone depositions of pollutant on marble salt weathering on inorganic building materials and weathering processes on mortars in many local to regional scale study areas in the Scandinavian Peninsula the United Kingdom Belgium France Italy Greece and Panama Besides monitoring the methodological approaches showcased include but are not limited to original material characterization decay product characterization and climate and numerical modelling on material components for assessing environmental impact and climate change effects

Yavneh Raz Kletter, Irit Ziffer, Wolfgang Zwickel, 2010 In the words of late Professor Moshe Kochavi the Philistine repository pit at Yavneh is the kind of discovery made only once every fifty years It is the richest repository pit ever found from Bronze and Iron Ages Israel Palestine containing thousands of cultic finds originating from a temple including an unprecedented number more than a hundred of cult stands so called architectural models carrying rich figurative art dozens of fire pans chalices and other objects The present volume includes the full publication of the excavation the stratigraphy the cult stands and the figures detached from cult stands several clay and stone altars and some pottery vessels related to burning of plant material most likely incense

This exceptional book raises a host of highly important and intriguing questions Is this a favissa or even a genizah Why are many cult stands badly broken while some are intact were cult stands broken on purpose What is the explanation for the unique stratigraphy and for the layer of gray ash in the pit was fire kindled inside as part of a ritual How do we know that these finds are Philistine Are they part of the furniture of the temple or objects dedicated by worshippers as votives Do the figures on the cult stands represent mortal beings or divinities If divinities can we relate them with Biblical or extra biblical data on the gods of the Philistines What was the function s of cult stands Were they models of buildings supports for images offering tables altars or perhaps incense burners Why are female figures dominant while male figures are virtually absent In discussing such topics Yavneh I treats issues that are central to many fields of study religion and cult in Iron Age Israel Palestine the history and archaeology of the Philistines and their western relations Near Eastern iconography the meaning of cult stands architectural models and the understanding of votive objects and of repository pits in general Literally salvaged from the teeth of a bulldozer these rare finds are now published Generations of scholars will discuss and reinterpret them there is no final word for such finds and hence this final excavation volume is not an end but a beginning Suggestions to Authors of the Reports of the United States Geological Survey Geological Survey (U.S.),1991 *Suggestions to Authors of the Reports of the United States Geological Survey* Wallace R. Hansen,1991 *Brazilian Paleofloras* Roberto Iannuzzi,Ronny Rössler,Lutz Kunzmann,2024-12-14 This book will cover the entire evolutionary history that the terrestrial plants have recorded in Brazilian sedimentary rocks ranging from the first vestiges of terrestrial environments colonization about 400 million years ago until reaching the eve of the present time when the current vegetation formations were organizing to reach their current distribution diversity and structure in modern biomes At present Brazil is home to the world s greatest plant biodiversity and we aim to offer here an opportunity to appreciate how this floral biodiversity originated and developed in these lowlands of South America through chapters elaborated by the best Brazilian paleobotanist and palynologists in collaboration with foreign experts who dedicate to elucidate the evolution of the ancient flora in this part of the planet

Medieval Sculpture in the Metropolitan Museum of Art and the Cloisters Metropolitan Museum of Art (New York, N.Y.), Lisbeth Castelnovo-Tedesco, Jack Soltanian, 2010 The collection of Italian medieval sculpture in The Metropolitan Museum of Art and The Cloisters began with the acquisition in 1908 of a Romanesque column statue today the Museum's holdings comprise more than seventy works dating from the ninth to the late fifteenth century The birthplaces of these works range from Sicily to Venice some typify local styles others illustrate the intense artistic exchanges taking place within Italy and between Italy and the wider world Technological advances of the last decades have made it possible to determine more precisely the materials and techniques from which works of art are made the history of their alteration and the mechanisms of their deterioration Using such techniques scholars have been able to ascertain for example that sculptures previously thought to be modern works carved in the medieval manner were in fact completely authentic This innovative volume represents a watershed in the study of sculpture a collaborative dialogue between an art historian and a conservator between art history and art science that deepens our understanding of the object we see while illuminating its elusive enigmatic history From publisher's description
