**Surface Modification to Improve Properties of Materials** Miran Mozetič,2019-04-16

This book contains selected contributions on surface modification to improve the properties of solid materials. The surface properties are tailored either by functionalization, etching or deposition of a thin coating. Functionalization is achieved by a brief treatment with non equilibrium gaseous plasma containing suitable radicals that interact chemically with the material surface and thus enable the formation of rather stable functional groups. Etching is performed in order to modify the surface morphology. The etching parameters are selected in such a way that a rich morphology of the surfaces is achieved spontaneously on the sub micrometer scale without using masks. The combination of adequate surface morphology and functionalization of materials leads to superior surface properties which are particularly beneficial for the desired response upon incubation with biological matter. Alternatively the materials are coated with a suitable thin film that is useful in various applications from food to aerospace industries.

The Cambridge Guide to Learning English as a Second Language Anne Burns, Jack C. Richards, 2018-03-15 This volume provides an up to date and comprehensive coverage of second language learning. The focus throughout the book is primarily on language learning but each chapter also discusses the implications for teaching and assessment thus informing both understanding and practice. The book contains nine sections which aim to organise and reflect different dimensions of the diverse and complex scope of learning English as a second or additional language. Four themes which permeate the chapters are learning and learners, learning and language, learning and language development, learning and learning context. The 36 chapters are up to date and authoritative, written by experts in the field. The content is accessibly written with questions for discussion and follow up reading suggestions provided.

*Specification of Drug Substances and Products* Christopher M. Riley, K. Lien Nguyen, 2024-09-22 *Specification of Drug Substances and Drug Products* is a fully comprehensive reference on Specification Setting for Pharmaceuticals. There have been several recent developments in the ICH Guidelines which were not captured in previous editions, notably the new guideline on Development of Analytical Procedure and the revisions to the validation guidelines and the specification guidelines. This edition contains chapters discussing the unique requirements for the universal critical quality attributes as well as the specific tests required to characterize and control different types of products ranging in complexity from small molecules in immediate release oral dosage forms to complex products such as drug antibody conjugates and mRNA based products. **Brittle Materials in Mechanical Extremes** Giovanni Bruno, 2021-06-18 The goal of the Special Issue Brittle Materials in Mechanical Extremes is to spark a discussion of the analogies and the differences between different brittle materials such as ceramics and concrete. The contributions to the Issue span from construction materials, asphalt and concrete to structural ceramics to ice. Data reported in the Issue were obtained by advanced microstructural techniques: microscopy, 3D imaging, etc., and linked to mechanical properties and their changes as a function of aging, composition, etc. The description of the mechanical behavior of brittle materials under operational loads, for instance, concrete and ceramics under very high temperatures, offers an unconventional viewpoint on the behavior of such materials. While it is by no means

exhaustive this Special Issue paves the road for the fundamental understanding and further development of materials

*Sense of Agency: Examining Awareness of the Acting Self* Nicole David, James W Moore, Sukhvinder Obhi, 2015-07-24 The sense of agency is defined as the sense of oneself as the agent of one's own actions This also allows oneself to feel distinct from others and contributes to the subjective phenomenon of self consciousness Gallagher 2000 Distinguishing oneself from others is arguably one of the most important functions of the human brain Even minor impairments in this ability profoundly affect the individual's functioning in society as demonstrated by psychiatric and neurological syndromes involving agency disturbances Della Sala et al 1991 Franck et al 2001 Frith 2005 Sirigu et al 1999 But the sense of agency also plays a role for cultural and religious phenomena such as voodoo superstition and gambling in which individuals experience subjective control over objectively uncontrollable entities Wegner 2003 Furthermore it plays into ethical and law questions concerning responsibility and guilt For these reasons a better understanding of the sense of agency has been important for neuroscientists clinicians philosophers of mind and the general society alike Significant progress has been made in this regard For example philosophical scrutiny has helped establish the conceptual boundaries of the sense of agency Bayne 2011 Gallagher 2000 2012 Pacherie 2008 Synofzik et al 2008 and scientific investigations have shed light on the neurocognitive basis of sense of agency including the brain regions supporting sense of agency Chambon et al 2013 David et al 2007 Farrer et al 2003 2008 Spengler et al 2009 Tsakiris et al 2010 Yomogida et al 2010 Despite this progress there remain a number of outstanding questions such as Are there cross cultural differences in the sense of agency How does the sense of agency develop in infants or change across the lifespan How does social context influence sense of agency What neural networks support sense of agency i.e connectivity and communication between brain regions What are the temporal dynamics with respect to neural processes underlying the sense of agency i.e the what and when of agency processing How can different cue models of the sense of agency be further specified and empirically supported especially with regards to cue integration weighting What are the applications of sense of agency research clinically engineering etc The concept of the sense of agency offers intriguing avenues for knowledge transfer across disciplines and interdisciplinary empirical approaches especially in addressing the aforementioned outstanding questions The aim of the present research topic is to promote and facilitate such interdisciplinarity for a better understanding of why and how we typically experience our own actions so naturally and

undoubtedly as ours and what goes awry when we do not We thus welcome contributions from for example i neuroscience and psychology including development psychology neuroscience ii psychiatry and neurology iii philosophy iv robotics and v computational modeling In addition to empirical or scientific studies of the sense of agency we also encourage theoretical contributions including reviews models and opinions      **Handbook of Psychotherapy Integration** John C.

Norcross, Marvin R. Goldfried, 2019 Psychotherapists have come to realize that given the complexity of human behavior no single theory or treatment can ever suffice for all patients disorders and situations The ideological cold war has abated as clinicians look across single school approaches to see what can be learned and how patients can benefit from alternative orientations Handbook of Psychotherapy Integration Third Edition now constitutes the most frequent orientation of mental health professionals This volume provides a comprehensive state of the art description of psychotherapy integration by leading proponents Replete with clinical vignettes this unique handbook will prove invaluable to practitioners students and researchers alike      Gluten-Free Diet Luca Elli, 2019-04-08 In the last few years an increasing number of individuals have adopted a gluten free diet GFD A significant proportion of that includes patients affected by celiac disease CD who have to follow a strict GFD for medical purposes However a high number of individuals are currently following a GFD without medical counseling and without a specific diagnosis needing a gluten withdrawal from the diet This is due to the frequently incorrect information diffused on the Internet and mass media on the topic of GFD For these reasons research on the GFD and its clinical use and biological effects is urgently needed
