Ecologies of Imperialism in Algeria Brock Cutler, 2023-10 Between 1865 and 1872 widespread death and disease unfolded amid the most severe ecological disaster in modern North African history a plague of locusts destroyed crops during a disastrous drought that left many Algerians landless and starving The famine induced migration that concentrated vulnerable people in unsanitary camps where typhus and cholera ran rampant Before the rains returned and harvests normalized some eight hundred thousand Algerians had died In *Ecologies of Imperialism in Algeria* Brock Cutler explores how repeated ecosocial divisions across an expansive ecosystem produced modern imperialism in nineteenth century Algeria Massive ecological crises cultural as well as natural cleaved communities from their homes individuals from those communities and society from its typical ecological relations At the same time the relentless albeit slow moving crises of ongoing settler colonialism and extractive imperial capitalism cleaved Algeria to France in a new way Ecosocial divisions became apparent in performances of imperial power officials along the Algerian Tunisian border compulsively repeated narratives of transgression that over decades made the division real a case of poisoned bread tied settlers in Algiers to Paris Morocco Algeria border violence exposed the exceptional nature of imperial sovereignty a case of vagabondage in Oran evoked colonial gender binaries In each case factors in the broader ecosystem were implicated in performances of social division separating political entities from each other human from nature rational from irrational and women from men Although these performances take place in the nineteenth century Maghrib the process they describe goes beyond those spatial and temporal limits across the field of modern imperialism to the present day **Catalogue of Copyright Entries**

Bibliographie de la France, ou Journal général de l'imprimerie et de la librairie, 1835 *A Short History of Police and Policing* Clive Emsley, 2021-02-25 The police are constantly under scrutiny They are criticized for failings praised for successes and hailed as heroes for their sacrifices Starting from the premise that every society has norms and ways of dealing with transgressors *A Short History of Police and Policing* traces the evolution of the multiple forms of policing that existed in the past It examines the historical development of the various bodies individuals and officials who carried these out

in different societies in Europe and European colonies but also with reference to countries such as ancient Egypt China and the USA By demonstrating that policing was never the exclusive dominion of the police and that the institution of the police as we know it today is a relatively recent creation Professor Emsley explores the idea and reality of policing and shows how an institution we now call the police came to be virtually universal in our modern world

The Oxford Handbook of Late Colonial Insurgencies and Counter-Insurgencies Martin Thomas,Gareth Curless,2023-10-10 The lethality of conflicts between insurgent groups and counter insurgent security forces has risen markedly since the Second World War just as those of conventional or inter state wars have declined For several decades conflicts within states rather than between them have been the prevalent form of organised political violence worldwide Recent conflicts in Afghanistan Iraq and Syria have fired interest in colonial experiences of rebellion while current western interventions in sub Saharan Africa have prompted accusations of militarist humanitarianism Yet despite mounting interest in counter insurgency and empire comparative investigation of colonial responses to insurrection and civil disorder is sparse Some scholars have written of a golden age of counter insurgency which began with Britain s declaration of a Malayan Emergency in 1948 and ended with the withdrawal of US ground troops from Vietnam in 1973 It is with this period if not with any presumed golden age that this volume is concerned This Handbook connects ideas about contested decolonization and the insurgencies that inspired it with an analysis of patterns and singularities in the conflicts that precipitated the collapse of overseas empires It attempts a systematic study of the global effects of organized anti colonial violence in Asia and Africa The objective is to reconceptualize late colonial violence in the European overseas empires by exploring its distinctive character and the globalizing processes underpinning it
