Steven M. Gelber,2008-10-01 The trading selling and buying of personal transport has changed little over the past one hundred years Whether horse trading in the early twentieth century or car buying today haggling over prices has been the common practice of buyers and sellers alike Horse Trading in the Age of Cars offers a fascinating study of the process of buying an automobile in a historical and gendered context Steven M Gelber convincingly demonstrates that the combative and frequently dishonest culture of the showroom floor is a historical artifact whose origins lie in the history of horse trading Bartering and bargaining were the norm in this predominantly male transaction with both buyers and sellers staking their reputations and pride on their ability to negotiate the better deal Gelber comments on this point of sale behavior and what it reveals about American men Gelber s highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century in the process adding a colorful and interesting chapter to the history of the automobile

**Perception and Buying Behaviour** Dr. G. Yoganandan, Mr. E. Pugazh, 2015-03-03 About the book Indian passenger car industry is considered as the mother industry for many other industries Industries like rubber paint glass electrical and electronics industries get lot of demand from the passenger car industry and thereby they prosper or suffer along with car industry The growth of Indian car industry can be associated with the fact that the India's strong engineering base and expertise in the manufacturing of low cost fuel efficient cars has resulted in the expansion of manufacturing facilities of several multinational automobile giants like BMW Mercedes Benz Hyundai Nissan Toyota Volkswagen and Maruti Suzuki Also it should be noted that the new generation of employees who constituted the major chunk of the Indian middleclass exhibited more spending orientation rather than saving orientation The car was once considered as a luxury item but slowly people started treating it as a facility The Indian car buyers are price conscious and also expect less maintenance expense and low running cost Therefore the people always has to think whether to go for petrol or diesel car since the petrol car is cheaper in terms of initial purchase price and low maintenance cost but on the other hand a diesel car is cheaper in terms of higher mileage and also cheaper fuel price until now The book focuses on the study that aimed at finding out the change in buying behavior of customers towards purchase of cars and their perception towards petrol and diesel cars This book would be handy to researchers undergraduate and postgraduate students belonging to management studies commerce economics and sociology disciplines to understand the buying behavior through a real world case study **Used-car Markets of**

G. Binmore, 2007-03-29 Ken Binmore's previous game theory textbook

Fun and Games D C Heath 1991 carved out a significant niche in the advanced undergraduate market it was intellectually serious and more up to date than its competitors but also accessibly written Its central thesis was that game theory allows us to understand many kinds of interactions between people a point that Binmore amply demonstrated through a rich range of examples and applications This replacement for the now out of date 1991 textbook retains the entertaining examples but changes the organization to match how game theory courses are actually taught making Playing for Real a more versatile

text that almost all possible course designs will find easier to use with less jumping about than before In addition the problem sections already used as a reference by many teachers have become even more clever and varied without becoming too technical Playing for Real will sell into advanced undergraduate courses in game theory primarily those in economics but also courses in the social sciences and serve as a reference for economists [The Robbery](#) at James Dewey Nickels,2012-02-21
