Why Criminalize? Thomas Søbirk Petersen,2019-11-28 The book defines and critically discusses the following five principles the harm principle legal paternalism the offense principle legal moralism and the dignity principle of criminalization The book argues that all five principles raise important problems that point to rejections or at least a rethink of standard principles of criminalization The book shows that one of the reasons why we should reject or revise standard principles of criminalization is that even the most plausible versions of the harm principle and legal paternalism that have been offered so far are rendered redundant by general moral theories Furthermore it demonstrates that the other three principles or versions thereof the offense principle legal moralism and the dignity principle of criminalization can either be covered by the harm principle thus making these principles also redundant or be seen to have what look like other unacceptable implications e g that versions of legal moralism are based on speculative and incorrect empirical assumptions or violate what is called the criminological levelling down challenge As such there is reason to move beyond traditional principles of criminalization and instead to investigate alternative principles the state should be guided by when attempting to justify which kinds of conduct should be criminalized Moreover this book presents and defends such a principle the utilitarian principle of criminalization Donors Petra Nordqvist,Leah Gilman,2022-10-14 Drawing on interviews with donors their kin and fertility counsellors the authors discuss what donation stories can tell us about contemporary understandings of connectedness time and morality in the context of reproduction and family life and consider how reproductive openness might be done differently Code of Federal Regulations ,1999 Fertile Ground Stephanie
