Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness of 100 young adults. The program consisted of three sessions per week, each lasting 45 minutes. The sessions included cardiovascular exercise, strength training, and flexibility exercises. The results showed that the participants experienced significant improvements in cardiovascular fitness, muscle strength, and flexibility. The program was well-received by the participants, and the improvements were maintained for at least 6 weeks after the end of the training. The study suggests that a 12-week training program can effectively improve the physical fitness of young adults.
