The Nonhuman Turn By Richard Grusin:

The Nonhuman Turn Richard Grusin, 2015-03-09 Edited by Richard Grusin of the Center for 21st Century Studies this is the first book to name and characterize and therefore consolidate a wide array of current critical theoretical and philosophical approaches to the humanities and social sciences under the concept of the nonhuman turn Each of these approaches is engaged in decentering the human in favor of a concern for the nonhuman understood by contributors in a variety of ways in terms of animals affectivity bodies materiality technologies and organic and geophysical systems The nonhuman turn in twenty first century studies can be traced to multiple intellectual and theoretical developments from the last decades of the twentieth century actor network theory affect theory animal studies assemblage theory cognitive sciences new materialism new media theory speculative realism and systems theory Such varied analytical and theoretical formations obviously diverge and disagree in many of their assumptions objects and methodologies However they all take up aspects of the nonhuman as critical to the future of twenty first century studies in the arts humanities and social sciences Unlike the posthuman turn the nonhuman turn does not make a claim about teleology or progress in which we begin with the human and see a transformation from the human to the posthuman Rather the nonhuman turn insists paraphrasing Bruno Latour that we have never been human that the human has always coevolved coexisted or collaborated with the nonhuman and that the human is identified precisely by this indistinction from the nonhuman Contributors Jane Bennett Johns Hopkins U Ian Bogost Georgia Institute of Technology Wendy Hui Kyong Chun Brown U Mark B N Hansen Duke U Erin Manning Concordia U Montreal Brian Massumi U of Montreal Timothy Morton Rice U Steven Shaviro Wayne State U Rebekah Sheldon Indiana U

Fagan,2024-09-30 *Finnegans Wake Human and Nonhuman Histories* opens new ground by exploring the productive tension between anthropocentric and non anthropocentric readings of James Joyce s final modernist masterpiece Drawing on the most up to date theories and methodologies the Anthropocene new materialism petroculture studies the blue humanities animal studies ecofeminism ecomedia twelve leading Joyce scholars offer valuable new insights into the interwoven historical and planetary dimensions of *Finnegans Wake* The volume s focus allows the contributors to read the *Wake* s nonhuman imaginary in original often surprising comparative contexts colonialism the Irish Revival the Free State s energy policies the invention of television and to spotlight enlightening nonhuman themes in Joyce s circular history bogs storms rivers bodily fluids skin wolves mourning DNA atoms labour music As these chapters show a century later *Finnegans Wake* remains a vibrant and vital text in which to interrogate the limits exploitations and common plight of human and nonhuman life in the 21st century

The Counterhuman Imaginary Laura Brown,2023-11-15 *The Counterhuman Imaginary* proposes that alongside the historical social and institutional structures of human reality that seem to be the sole subject of the literary text an other than human world is everywhere in evidence Laura Brown finds that within eighteenth century British literature the human cultural imaginary can be seen equally as a counterhuman imaginary an alternative realm whose scope and terms exceed human understanding or order Through close readings of works by Daniel Defoe Jonathan Swift and Alexander Pope along with lapdog lyrics circulation narratives that give agency to inanimate objects like coins and carriages and poetry about the Lisbon earthquake of 1755 Brown traces the ways presence and power of the nonhuman weather natural disasters animals even the concept of love not only influence human creativity subjectivity and history but are inseparable from them Traversing literary theory animal studies new materialism ecocriticism and affect theory *The Counterhuman Imaginary* offers an original repudiation of the centrality of the human to advance an integrative new methodology for reading chaos fluidity force and impossibility in literary culture

Fiction Without Humanity Lynn Festa,2019-06-28 Although the Enlightenment is often associated with the emergence of human rights and humanitarian sensibility humanity is an elusive category in the literary philosophical scientific and political writings of the period *Fiction Without Humanity* offers a literary history of late seventeenth and early eighteenth century efforts to define the human Focusing on the shifting terms in which human difference from animals things and machines was expressed Lynn Festa argues that writers and artists treated humanity as an indefinite class which needed to be called into being through literature and the arts Drawing on an array of literary scientific artistic and philosophical devices the riddle the fable the microscope the novel and trompe l oeil and still life painting *Fiction Without Humanity* focuses on experiments with the perspectives of nonhuman creatures and inanimate things Rather than deriving species membership from sympathetic identification or likeness to a fixed template early Enlightenment writers and artists grounded humanity in the enactment of capacities reason speech educability that distinguish humans from other creatures generating a performative model of humanity capacious enough to accommodate

broader claims to human rights In addressing genres typically excluded from canonical literary histories Fiction Without Humanity offers an alternative account of the rise of the novel showing how these early experiments with nonhuman perspectives helped generate novelistic techniques for the representation of consciousness By placing the novel in a genealogy that embraces paintings riddles scientific plates and fables Festa shows realism to issue less from mimetic exactitude than from the tailoring of the represented world to a distinctively human point of view **Documentary's**

Expanded Fields Jihoon Kim, 2022 Documentary s Expanded Fields New Media and the Twenty First Century Documentary offers a theoretical mapping of contemporary non standard documentary practices enabled by the proliferation of new digital imaging lightweight and non operator digital cameras multiscreen and interactive interfaces and web 2 0 platforms These emergent practices encompass digital data visualizations digital films that experiment with the deliberate manipulation of photographic records documentaries based on drone cameras GoPros and virtual reality VR interfaces documentary installations in the gallery interactive documentary i doc citizens vernacular online videos that document scenes of the protests such as the Arab Spring the Hong Kong Protests and the Black Lives Matter Movements and new activist films videos and archiving projects that respond to those political upheavals Building on the interdisciplinary framework of documentary studies digital media studies and contemporary art criticism Jihoon Kim investigates the ways in which these practices both challenge and update the aesthetic epistemological political and ethical assumptions of traditional film based documentary Providing a diverse range of case studies that classify and examine these practices the book argues that the new media technologies and the experiential platforms outside the movie theater such as the gallery the world wide web and social media services expand five horizons of documentary cinema image vision dispositif archive and activism This reconfiguration of these five horizons demonstrates that documentary cinema in the age of new media and platforms which Kim labels as the twenty first century documentary dynamically changes its boundaries while also exploring new experiences of reality and history in times of the contemporary crises across the globe including the COVID 19 pandemic **The**

Cambridge Companion to Environmental Humanities Jeffrey Cohen, Stephanie Foote, 2021-09-02 Offers a comprehensive introduction to the environmental humanities It addresses the 21st century recognition of an environmental crisis Photography's Materialities Geoff Bender, Rasmus R. Simonsen, 2021-05-17 There is little dispute that photography is a material practice and that the photograph itself is ineluctably material And yet matter material and materiality have proven to be remarkably elusive terms of inquiry frequently producing studies that are disparate in scope sharing seemingly little common ground Although the wide methodological range of materialist study can be dizzying it is this book s contention that that multiplicity is also the field s greatest asset keeping materialist inquiry enduringly vibrant provided that varying methods are in close enough proximity to converse Photography s Materialities orchestrates one such conversation Juxtaposing the insights of theorists like Lacan Benjamin and Latour beside close studies of crime spirit and composite
