American Workers, Colonial

Power Dorothy B. Fujita-Rony, 2003-03-04 An immensely ambitious book American Workers Colonial Power is a regional history with ever widening spatial and social circles each one layered and complex Filipina o Seattle this study shows reflects and exemplifies much of the American West and U S and affirms the mutually influential relationship especially in terms of culture between the U S and the Philippines This is a work of deep scholarship and broad significance Gary Y Okihiro author of Common Ground Reimagining American History *Beyond the Missouri* Richard W. Etulain, 2006 This new historical overview tells the dramatic story of the American West from its prehistory to the present A narrative history it covers the region from the North Dakota to Texas states to the Pacific Coast and includes experiences and contributions of American Indians Hispanics and African Americans **The Indian Frontier, 1763-1846** R. Douglas Hurt, 2002 A sweeping history of the cultural clashes between Indians and the British Spanish Mexicans and Americans A story of the contest for land and power across multiple and simultaneous frontiers **The Sea is My Country** Joshua L. Reid, 2015-01-01 The first full scale history of the Makah people of the Pacific Northwest whose culture and identity are closely bound to the sea For the Makahs a tribal nation at the most northwestern point of the contiguous United States a deep relationship with the sea is the locus of personal and group identity Unlike most other indigenous tribes whose lives are tied to lands the Makah people have long placed marine space at the center of their culture finding in their own waters the physical and spiritual resources to support themselves This book is the first to explore the history and identity of the Makahs from the arrival of maritime fur traders in the eighteenth century through the intervening centuries and to the present day Joshua L Reid discovers that the People of the Cape were far more involved in shaping the maritime economy of the Pacific Northwest than has been understood He examines Makah attitudes toward borders and boundaries their efforts to exercise control over their waters and resources as Europeans and then Americans arrived and their embrace of modern opportunities and technology to maintain autonomy and resist assimilation The author also addresses current environmental debates relating to the tribe s customary whaling and fishing rights and illuminates the efforts of the Makahs to regain control over marine space preserve their marine oriented identity and articulate a traditional future **The American West** Michael P. Ryden, 1993 Any landscape has an unseen component a subjective component of experience memory and narrative which people familiar with the place understand to be an integral part of its geography but which outsiders may not suspect the existence of OUnless they listen and read carefully This invisible landscape is made visible through stories and these stories are the focus of this engrossing book Traveling across the invisible landscape in which we imaginatively dwell Kent Ryden OCo himself a most careful listener and reader OCo asks the following questions What

categories of meaning do we read into our surroundings What forms of expression serve as the most reliable maps to understanding those meanings Our sense of any place he argues consists of a deeply ingrained experiential knowledge of its physical makeup an awareness of its communal and personal history a sense of our identity as being inextricably bound up with its events and ways of life and an emotional reaction positive or negative to its meanings and memories Ryden demonstrates that both folk and literary narratives about place bear a striking thematic and stylistic resemblance Accordingly Mapping the Invisible Landscape examines both kinds of narratives For his oral materials Ryden provides an in depth analysis of narratives collected in the Coeur d Alene mining district in the Idaho panhandle for his consideration of written works he explores the OC essay of place OCO the personal essay which takes as its subject a particular place and a writer s relationship to that place Drawing on methods and materials from geography folklore and literature Mapping the Invisible Landscape offers a broadly interdisciplinary analysis of the way we situate ourselves imaginatively in the landscape the way we inscribe its surface with stories Written in an extremely engaging style this book will lead its readers to an awareness of the vital role that a sense of place plays in the formation of local cultures to an understanding of the many layered ways in which place interacts with individual lives and to renewed appreciation of the places in their own lives and landscapes

Landscapes of Promise William G. Robbins, 2009-11-23 *Landscapes of Promise* is the first comprehensive environmental history of the early years of a state that has long been associated with environmental protection Covering the period from early human habitation to the end of World War II William Robbins shows that the reality of Oregon s environmental history involves far more than a discussion of timber cutting and land use planning Robbins demonstrates that ecological change is not only a creation of modern industrial society Native Americans altered their environment in a number of ways including the planned annual burning of grasslands and light burning of understory forest debris Early Euro American settlers who thought they were taming a virgin wilderness were merely imposing a new set of alterations on an already modified landscape Beginning with the first 18th century traders on the Pacific Coast alterations to Oregon s landscape were closely linked to the interests of global market forces Robbins uses period speeches and publications to document the increasing commodification of the landscape and its products Environment melts before the man who is in earnest wrote one Oregon booster in 1905 reflecting prevailing ways of thinking In an impressive synthesis of primary sources and historical analysis Robbins traces the transformation of the Oregon landscape and the evolution of our attitudes toward the natural world

The Environment in American History Jeff Crane, 2014-11-27 From pre European contact to the present day people living in what is now the United States have constantly manipulated their environment The use of natural resources animals plants minerals water and land has produced both prosperity and destruction reshaping the land and human responses to it *The Environment in American History* is a clear and comprehensive account that vividly shows students how the environment played a defining role in the development of American society Organized in thirteen

chronological chapters and extensively illustrated the book covers themes including Native peoples manipulation of the environment across various regions The role of Old World livestock and diseases in European conquests Plantation agriculture and slavery Westward expansion and the exploitation of natural resources Environmental influences on the Civil War and World War II The emergence and development of environmental activism Industrialization and the growth of cities and suburbs Ecological restoration and climate change Each chapter includes a selection of primary documents and the book is supported by a robust companion website that provides further resources for students and instructors Drawing on current scholarship Jeff Crane has created a vibrant and engaging survey that is a key resource for all students of American environmental history

Providence and the Invention of American History Sarah Koenig, 2021-01-01 How providential history the conviction that God is an active agent in human history has shaped the American historical imagination In 1847 Protestant missionary Marcus Whitman was killed after a disastrous eleven year effort to evangelize the indigenous peoples of the Pacific Northwest By 1897 Whitman was a national hero celebrated in textbooks monuments and historical scholarship as the Savior of Oregon But his fame was based on a tall tale one that was about to be exposed Sarah Koenig traces the rise and fall of Protestant missionary Marcus Whitman's legend revealing two patterns in the development of American history On the one hand is providential history marked by the conviction that God is an active agent in human history and that historical work can reveal patterns of divine will On the other hand is objective history which arose from the efforts of Catholics and other racial and religious outsiders to resist providentialists pejorative descriptions of non Protestants and nonwhites Koenig examines how these competing visions continue to shape understandings of the American past and the nature of historical truth

Currents of Change Todd Jennings, 2003

Driven Wild Paul S. Sutter, 2009-11-23 In its infancy the movement to protect wilderness areas in the United States was motivated less by perceived threats from industrial and agricultural activities than by concern over the impacts of automobile owners seeking recreational opportunities in wild areas Countless commercial and government purveyors vigorously promoted the mystique of travel to breathtakingly scenic places and roads and highways were built to facilitate such travel By the early 1930s New Deal public works programs brought these trends to a startling crescendo The dilemma faced by stewards of the nation's public lands was how to protect the wild qualities of those places while accommodating and often encouraging automobile based tourism By 1935 the founders of the Wilderness Society had become convinced of the impossibility of doing both In *Driven Wild* Paul Sutter traces the intellectual and cultural roots of the modern wilderness movement from about 1910 through the 1930s with tightly drawn portraits of four Wilderness Society founders Aldo Leopold Robert Sterling Yard Benton MacKaye and Bob Marshall Each man brought a different background and perspective to the advocacy for wilderness preservation yet each was spurred by a fear of what growing numbers of automobiles aggressive road building and the meteoric increase in Americans turning to nature for their leisure would do to the country's wild places As Sutter discovered the founders of the Wilderness Society were driven wild

pushed by a rapidly changing country to construct a new preservationist ideal Sutter demonstrates that the birth of the movement to protect wilderness areas reflected a growing belief among an important group of conservationists that the modern forces of capitalism industrialism urbanism and mass consumer culture were gradually eroding not just the ecology of North America but crucial American values as well For them wilderness stood for something deeply sacred that was in danger of being lost so that the movement to protect it was about saving not just wild nature but ourselves as well

Camping Grounds Phoebe S. K. Young, 2021 *Camping Grounds* narrates a quintessentially American tradition of sleeping outdoors from the Civil War to the present that will appeal to academics outdoor enthusiasts and general readers alike

Mental Territories Katherine G. Morrissey, 2018-09-05 Rarely recognized outside its boundaries today the Pacific Northwest region known at the turn of the century as the Inland Empire included portions of the states of Washington and Idaho as well as British Columbia Katherine G Morrissey traces the history of this self proclaimed region from its origins through its heyday In doing so she challenges the characterization of regions as fixed places defined by their geography economy and demographics Regions she argues are best understood as mental constructs internally defined through conflicts and debates among different groups of people seeking to control a particular area s identity and direction She tells the story of the Inland Empire as a complex narrative of competing perceptions and interests

Latin America's Democratic Crusade Allen Wells, 2023-09-26 By emphasizing Latin American reformers decades long struggle to defeat authoritarianism this transnational history challenges the timeworn Cold War paradigm and recasts the region s political evolution Scholars persist in framing the Cold War as a battle between left and right one in which the Global South is cast as either witting or unwitting proxies of Washington and Moscow What if the era is told from the perspective of the many who preferred reform to revolution Scholars have routinely neglected dismissed or caricatured moderate politicians In this book Allen Wells argues that until the Cuban Revolution the struggle was not between capitalism and communism that was Washington s abiding preoccupation but between democracy and dictatorship Beginning in the 1920s the fight against authoritarianism was contested on multiple fronts political ideological and cultural taking on the dimensions of a political crusade Convinced that despots represented an existential threat reformers declared that no civilian government was safe until the cancer of dictatorship was excised from the hemisphere Dictators retaliated often with deadly results exporting strategies that had been honed at home to guarantee their political survival Grafted onto this war without borders was a belated Cold War with all its political convulsions the aftershocks of which are still felt today
