thought provoking book we delve into the fascinating and often perplexing world of time travel We explore the different theories of time travel from the scientific to the philosophical and discuss the potential dangers and benefits of this incredible possibility One of the most fundamental questions about time travel is how would it work There are a number of different theories each with its own strengths and weaknesses Some theories suggest that time travel is possible through wormholes which are hypothetical tunnels through spacetime Others suggest that it is possible to travel through time by manipulating the speed of light Another major question about time travel is what would the implications be If we could travel through time we could potentially change the past with both positive and negative consequences We could also learn more about the history of the universe and our place in it Of course there are also a number of potential dangers associated with time travel If we are not careful we could create paradoxes which are situations where cause and effect are reversed We could also inadvertently change the course of history in ways that we cannot predict Despite the dangers the potential benefits of time travel are immense If we could learn to travel through time we could potentially solve some of the world s most pressing problems such as climate change and poverty We could also learn more about the universe and our place in it Whether or not time travel is possible is still a matter of debate However the idea of traveling through time continues to inspire and fascinate us This book explores the science philosophy and ethics of time travel and considers the implications of this incredible possibility It is a must read for anyone who is interested in the mysteries of time and the nature of reality If you like this book write a review

The essays in this collection address the current preoccupation with neurological conditions and disorders in contemporary literature by British and American writers The book places these fictional treatments within a broader cultural and historical context exploring such topics as the two cultures debate the neurological turn postmodernism and the post postmodern and responses to September 11th Considering a variety of materials including mainstream literary fiction the graphic novel popular fiction autobiographical writing film and television contributors consider the contemporary dimensions of the interface between the sciences and humanities developing the debate about the post postmodern as a new humanism or a return to realism and investigating questions of form and genre and of literary continuities and discontinuities Further the essays discuss contemporary writers attempts to engage the relation between the individual and the social looking at the relation between the syndrome syndrome referring to the prevalence in contemporary literature of neurological phenomena evident at the biological level and existing work in the field of trauma studies where explanations tend to have taken a psychoanalytical form allowing for perspectives that question some of the assumptions that have marked both these fields The current literary preoccupation with neurological conditions presents us with a new and distinctive form

of trauma literature one concerned less with psychoanalysis than with the physical and evolutionary status of human beings
